Language Contact In The Arctic Trends In Linguistics Studies And Monographs:

Language Contact in the Arctic Ernst Hakon Jahr, Ingvild Broch, 2011-06-03 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

The Handbook of Language Contact Raymond Hickey, 2020-09-01 The second edition of the definitive reference on contact studies and linguistic change provides extensive new research and original case studies. Language contact is a dynamic area of contemporary linguistic research that studies how language changes when speakers of different languages interact. Accessibly structured into three sections, *The Handbook of Language Contact* explores the role of contact studies within the field of linguistics, the value of contact studies for language change research, and the relevance of language contact for sociolinguistics. This authoritative volume presents original findings and fresh research directions from an international team of prominent experts. Thirty seven specially commissioned chapters cover a broad range of topics and case studies of contact from around the world. Now in its second edition, this valuable reference has been extensively updated with new chapters on topics including globalization, language acquisition, creolization, code switching, and genetic classification. Fresh case studies examine Romance, Indo-European, African, Mayan, and many other languages in both the past and the present. Addressing the major issues in the field of language contact studies, this volume includes a representative sample of individual studies which re-evaluate the role of language contact in the broader context of language and society. Offers 23 new chapters written by leading scholars. Examines language contact in different societies including many in Africa and Asia. Provides a cross section of case studies drawing on languages across the world. *The Handbook of Language Contact* Second Edition is an indispensable resource for researchers, scholars, and students involved in language contact, language variation, and change, sociolinguistics, bilingualism, and language theory.

The Languages and Linguistics of Northern Asia Edward Vajda, 2024-03-04 *The Languages and Linguistics of Northern Asia: A Comprehensive Guide* surveys the indigenous languages of Asia's North Pacific Rim, Siberia, and adjacent portions of Inner Eurasia. It provides in-depth descriptions of every first-order family of this vast area, with special emphasis on family internal subdivision and dialectal differentiation. Individual chapters trace the origins and expansion of the region's widespread pastoral-based language groups as well as the

microfamilies and isolates spoken by northern Asia's surviving hunter gatherers. Separate chapters cover sparsely recorded languages of early Inner Eurasia that defy precise classification and the various pidgins and creoles spread over the region. Other chapters investigate the typology of salient linguistic features of the area including vowel harmony, noun inflection, verb indexing, also known as agreement complex morphologies, and the syntax of complex predicates. Issues relating to genealogical ancestry, areal contact, and language endangerment receive equal attention. With historical connections both to Eurasia's pastoral based empires as well as to ancient population movements into the Americas, the steppes, taiga, forests, tundra, and coastal fringes of northern Asia offer a complex and fascinating object of linguistic investigation.

Language Relations Across The Bering Strait Michael Fortescue, 1998-11-01. In building up a scenario for the arrival on the shores of Alaska of speakers of languages related to Eskimo-Aleut with genetic roots deep within Sineria, this book touches upon a number of issues in contemporary historical linguistics and archaeology. The Arctic gateway to the New World, by acting as a bottleneck, has allowed only small groups of mobile hunter gatherers through during specific propitious periods and thus provides a unique testing ground for theories about population and language movements in pre-agricultural times. Owing to the historically attested prevalence of language shifts and other contact phenomena in the region, it is arguable that the spread of genes and the spread of language have been out of step since the earliest reconstructable times, contrary to certain views of their linkage. Proposals that have been put forward in the past concerning the affiliations of Eskimo-Aleut languages are followed up in the light of recent progress in reconstructing the proto-languages concerned. Those linking Eskimo-Aleut with the Uralic languages and Yukagir are particularly promising, and reconstructions for many common elements are presented. The entire region, Great Beringia, is scoured for typological evidence in the form of anomalies and constellations of uncommon traits diagnostic of affiliation or contact. The various threads lead back to mesolithic times in south-central Siberia when speakers of a Uralo-Siberian mesh of related languages appears to have moved along the major waterways of Siberia. Such a scenario would account for the present distribution of these languages and the results of their meeting with remnants of earlier linguistic waves from the Old World to the New.

Language Change in the Wake of Empire Aaron Michael Butts, 2016-04-08. It is well documented that one of the primary catalysts of intense language contact is the expansion of empire. This is true not only of recent history but it is equally applicable to the more remote past. An exemplary case, or better cases of this, involves Aramaic. Due to the expansions of empires, Aramaic has throughout its long history been in contact with a variety of languages including Akkadian, Greek, Arabic, and various dialects of Iranian. This book focuses on one particular episode in the long history of Aramaic language contact: the Syriac dialect of Aramaic in contact with Greek. In this book, Butts presents a new analysis of contact-induced changes in Syriac due to Greek. Several chapters analyze the more than eight hundred Greek loanwords that occur in Syriac texts from Late Antiquity that were not translated from Greek. Butts also dedicates several chapters to a different category of contact-induced change in which Syriac speakers replicated inherited

Aramaic material on the model of Greek All of the changes discussed in the book are located within their broader Aramaic context and analyzed through a robust contact linguistic framework By focusing on the Syriac language itself Butts introduces new and arguably more reliable evidence for locating Syriac Christianity within its Greco Roman context This book thus is especially important for the field of Syriac studies The book also contributes to the fields of contact linguistics and the study of ancient languages more broadly by analyzing in detail various types of contact induced change over a relatively long period of time

Bibliographie Linguistique de L'annee 1999 Mark Janse, Hella Olbertz, Sijmen Tol, 2003-11-30 Setting out the historical national and religious characteristics of the Italians as they impact on the integration within the European Union this study makes note of the two characteristics that have an adverse effect on Italian national identity cleavages between north and south and the dominant role of family It discusses how for Italians family loyalty is stronger than any other allegiance including feelings towards their country their nation or the EU Due to such subnational allegiances and values this book notes that Italian civic society is weaker and engagement at the grass roots is less robust than one finds in other democracies leaving politics in Italy largely in the hands of political parties The work concludes by noting that EU membership however provides no magic bullet for Italy it cannot change internal cleavages the Italian worldview and family values or the country's mafia dominated power matrix and as a result the underlying absence of fidelity to a shared polity Italian or European leave the country as ungovernable as ever

A typology of questions in Northeast Asia and beyond Andreas Hölzl, 2018-08-29 This study investigates the distribution of linguistic and specifically structural diversity in Northeast Asia NEA defined as the region north of the Yellow River and east of the Yenisei In particular it analyzes what is called the grammar of questions GQ i.e. those aspects of any given language that are specialized for asking questions or regularly combine with these The bulk of the study is a bottom up description and comparison of GQs in the languages of NEA The addition of the phrase and beyond to the title of this study serves two purposes First languages such as Turkish and Chuvash are included despite the fact that they are spoken outside of NEA since they have ties to or even originated in the region Second despite its focus on one area the typology is intended to be applicable to other languages as well Therefore it makes extensive use of data from languages outside of NEA The restriction to one category is necessary for reasons of space and clarity and the process of zooming in on one region allows a higher resolution and historical accuracy than is usually the case in linguistic typology The discussion mentions over 450 languages and dialects from NEA and beyond and gives about 900 glossed examples The aim is to achieve both a cross linguistically plausible typology and a maximal resolution of the linguistic diversity of Northeast Asia

The Oxford Handbook of Language Contact Anthony P. Grant, 2020-01-10 Every language has been influenced in some way by other languages In many cases this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from

Russian Japanese and Arabic respectively In other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre existing language For example English s structure has been shaped in such a way by the effects of Norse French Latin and Celtic though English is not alone in its openness to these influences Any features can potentially be transferred from one language to another if the sociolinguistic and structural circumstances allow for it Further new languages pidgins creoles and mixed languages can come into being as the result of language contact In thirty three chapters The Oxford Handbook of Language Contact examines the various forms of contact induced linguistic change and the levels of language which have provided instances of these influences In addition it provides accounts of how language contact has affected some twenty languages spoken and signed from all parts of the world Chapters are written by experts and native speakers from years of research and fieldwork Ultimately this Handbook provides an authoritative account of the possibilities and products of contact induced linguistic change *The Foundations of Latin* Philip Baldi,1999 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing Algonquian and Iroquoian Linguistics ,1996
