P. Benson, G. Barkhuizen, P. Bodycott, J. Brown, 2013-08-15 Study abroad is now both an international industry and an experience that can have a deep impact on students' attitudes and approaches to second language learning. *Narratives of Second Language Identity in Study Abroad* brings together three important research areas by exploring the impact of study abroad on second language identities through narrative research. It outlines a new model of second language identity that incorporates a range of language and personal competencies. The three main dimensions of this model are explored in chapters that begin with students' study abroad narratives followed by the authors' in-depth analysis. Further chapters use narratives to assess the impact of programme type and individual difference. Arguing that second language identity development is one of the more important outcomes of study abroad, the book concludes with recommendations on how study abroad programmes can best achieve this outcome. **The Routledge Handbook of Hispanic Applied Linguistics** Manel

Lacorte, 2014-09-19 This book provides a comprehensive overview of Hispanic applied linguistics, allowing students to understand the field from a variety of perspectives and offering insight into the ever-growing number of professional opportunities afforded to Spanish language program graduates. The goal of this book is to re-contextualize the notion of applied linguistics as simply the application of theoretical linguistic concepts to practical settings and to consider it as its own field that addresses language-based issues and problems in a real-world context. The book is organized into five parts: 1. perspectives on learning Spanish; 2. issues and environments in Spanish teaching; 3. Spanish in the professions; 4. the discourses of Spanish; and 5. social and political contexts for Spanish. The book's all-inclusive coverage gives students the theoretical and sociocultural context for study in Hispanic applied linguistics while offering practical information on its application in the professional sector.
