A Functional Linguistic Perspective on Developing Language Anne McCabe, 2021-06-23 This volume offers a comprehensive account of language development from a Systemic Functional Linguistic SFL perspective integrating theory and data from a wide range of research studies The book begins by taking an in depth look at SFL theory and its focus on texts highlighting the metafunctional nature of language and the ways in which individuals repertoires of meaning making resources develop as they interact with the world and with others Grounded in an SFL approach the successive chapters consider in turn the key stages of language development from infancy to school settings to additional second and foreign language learning contexts Each chapter incorporates a range of SFL studies to demonstrate shifts in language development across these stages but also the discussion of other functional perspectives to examine the ways in which these different approaches inform one another A concluding chapter considers the implications of these studies for future research as well as for pedagogical practices in literacy teaching In its consideration of the relationship between SFL theory and its application to language development this book will be key reading for students and scholars in Systemic Functional Linguistics language and education and literacy studies

Functional Linguistics Jonathan J. Webster, Xuanwei Peng, 2017-01-26 Applying Systemic Functional Linguistics The State of the Art in China Today showcases new work from leading scholars in China as well as offering perspectives on this work from M A K Halliday and Jim Martin The range of topics covers graphology phonology lexis group and clause clause complex text typology semiotics multimodality stylistics translation and teaching Not only will this book introduce the latest research into language and multimodal discourse being undertaken by scholars in China today but also suggest the way forward in terms of where linguistics should be going if the aim is still to create the innovative producers of social semiotic theory description and practice the world rightfully expects from the intellectual superpower China is economically positioned to become Jim Martin This book is essential reading for scholars involved with systemic functional linguistics and interested in its shifting dynamics *Advances in Language and Education* Anne McCabe, Mick O'Donnell, Rachel Whittaker, 2007-07-19

This book examines new functional approaches to language and education and the impact of these on literacy in the classroom The first section looks at issues of multimodality in which the definition of a text is expanded to include not only that which is written down but also the interaction of writing graphics and audiovisual material The contributors explores ways in which language education can be expanded to deal with multimodal discourse whether in children s books in textbooks or on the web The second section looks at how critical discourse analysis and appraisal theory can be used as tools for assessing the effectiveness of student writing and literacy achievement and also for helping developing writers to write more successfully The final section argues that corpus based studies of language have changed the way we see language and that the way we teach language should evolve in line with these changes This appealing survey of new directions in language

and education includes contributions from internationally renowned scholars It will be of interest to researchers in systemic functional linguistics or language and education *Resources in Education* ,2001 **The Register-Functional Approach to Grammatical Complexity** Douglas Biber,Bethany Gray,Shelley Staples,Jesse Egbert,2021-12-30 This collection brings together the authors previous research with new work on the Register Functional RF approach to grammatical complexity offering a unified theoretical account for its further study The book traces the development of the RF approach from its foundations in two major research strands of linguistics the study of sociolinguistic variation and the text linguistic study of register variation Building on this foundation the authors demonstrate the RF framework at work across a series of corpus based research studies focused specifically on grammatical complexity in English The volume highlights early work exploring patterns of grammatical complexity in present day spoken and written registers as well as subsequent studies which extend this research to historical patterns of register variation and the application of RF research to the study of writing development for L1 and L2 English university students Taken together along with the addition of introductory chapters connecting the different studies the volume offers readers with a comprehensive resource to better understand the RF approach to grammatical complexity and its implications for future research The volume will appeal to students and scholars with research interests in either descriptive linguistics or applied linguistics especially those interested in grammatical complexity and empirical corpus based approaches Preparing Teachers to Work with Multilingual Learners Meike Wernicke,Svenja Hammer,Antje Hansen,Tobias Schroedler,2021-04-15 This collection examines a diverse range of approaches to multilingualism in teacher education programmes across Europe and North America The authors investigate how pre service teachers are being prepared to work in multilingual contexts and discuss the key features of current pre service teacher education initiatives that address the increasing linguistic and cultural diversity evident in classrooms in their respective countries The focus is not only on migrant background learners but includes students from Indigenous autochthonous and heritage language backgrounds and speakers of minoritised regional varieties The chapters contextualise both historically and ideologically the specific initiatives and measures taken in the participating countries They also reveal the complexity of each educational context and the role that history language policies and institutional and programmatic priorities play in the development and implementation of a multilingual focus in teacher education In exploring how pre service teachers are being prepared to work in multilingual contexts the authors take a critical view of how multilingualism itself is conceptualised within and across contexts The book highlights the valuable impact that explicit instruction on theories of multilingualism pedagogies in multilingual classrooms and lived realities of multilingual children can have on the beliefs and practices of pre service teachers Disciplinary: Functional Linguistic and Sociological Perspectives Frances Christie,Karl Maton,2011-02-03 Disciplinary knowledge is under threat in the modern world Claims abound that we are entering a landscape in which the division of disciplines is obsolete implying a commitment to outdated values in scholarship

Notions of discipline are critiqued as reflecting social power and representing the worldview of dominant social groups By addressing and challenging such claims this edited collection argues that proclamations of the death of disciplines have been greatly overstated Not only are the notions of disciplinarity still important for understanding how we come to know the world but this volume demonstrates how significant disciplinarity is to understanding different forms of knowledge if we wish to improve the building of knowledge and educational practice Using analytical tools from systemic functional linguistics theory and social realist sociology this volume illustrates how different disciplines can collaborate and cross fertilize successfully without losing their distinctive insights and disciplinary integrity The subsequent theory developed will thereby extend both linguistic and sociological approaches to the topic and make a major contribution to educational theory Meaning Making in Text S. Starc,C. Jones,A. Maiorani,2015-05-05 Meaning Making in Text presents new insights into forms of communication in a range of contexts cultural linguistic multimodal and educational The thirteen chapters are all linked theoretically by advances in Systemic Functional Linguistics SFL School Discourse Frances Christie,Beverly Derewianka,2010-09-17

Writing with Students Lucy Macnaught,2024-08-08 Beginning with a review of the theory and pedagogic practices that have been influential in English for Academic Purposes EAP contexts this book examines the practice of joint construction in a genre based approach to literacy pedagogy It investigates how teachers guide students to co construct a text drawing attention to the contested rationale for teachers taking a leading role when writing collaboratively with their students Informed by systemic functional linguistics the book puts forward an accessible approach to the analysis of classroom discourse that centres on the dynamic mediation of meaning Through examples of classroom interaction involving international students who are studying EAP and specifically as preparation for university entrance it illuminates how classroom metalanguage and the organisation of classroom talk enables teachers to guide but not provide wording metalanguage also enables students to critique and justify their choices as they try out new academic language modify and improve their writing
