## **Language Of Science Volume 5 M A K Halliday:**

*Language of Science* M.A.K. Halliday, 2006-06-19 Halliday's investigations into grammatical metaphor take us deeply into the way we construct and expand meanings starting with representations of concrete experienced events and ending with theoretical worlds populated by abstract entities linked through generalized relations and causalities. He finds these processes most strikingly in the development of the modern sciences that have historically created robust virtual worlds of theory from observable material events. He sees the same processes of grammatical metaphor as children learn to participate in our built symbolic environment particularly as they are introduced to these meaning systems in schools an institution designed expressly for that purpose. **ATTRIBUTED MEANINGS** Miriam PÉREZ VENEROS, 2017-12-01 Esta tesis doctoral versa sobre el estudio de la construcción de la atribución del significado en la disseminación de la ciencia en la prensa británica a través del análisis de los recursos utilizados por el periodista para integrar en su narración de los hechos científicos lo que otras fuentes externas han dicho. El fenómeno de la atribución en el discurso académico científico y de los medios de comunicación se ha descrito previamente desde una perspectiva interpersonal mediante el análisis de la evaluación y de la teoría de la valoración appraisal. Además otras investigaciones previas se han centrado también en el estudio de cómo los elementos experienciales de la atribución. Sin embargo el estudio llevado a cabo en esta tesis doctoral trata de proporcionar una descripción más exhaustiva y una visión global de cómo se construye la atribución desde una perspectiva experiencial. El objetivo de esta tesis es explorar cómo los elementos experienciales que construyen la atribución coocurren en cada una de las unidades de voz identificadas y contribuyen tanto a la interacción del periodista con sus lectores como al posicionamiento epistemológico de dicho periodista con respecto de la información narrada **War and Its Ideologies** Annabelle Lukin, 2018-10-09 Ideology is so powerful it makes us believe that war is rational despite both its brutal means and its devastating ends. The power of ideology comes from its intimate relation to language ideology recruits all semiotic modalities but language is its engine room. Drawing on Halliday's linguistic theory in particular his account of the semiotic big bang this book explains the latent semiotic machinery of language on which ideology depends. The book illustrates the ideological power of language through a study of perhaps the most significant and consequential of our ideologies those that enable us to legitimate celebrate even venerate war at the same time that we abhor denounce and proscribe violence. To do so it makes use of large multi register corpora including the British National Corpus and the reporting of the 2003 invasion of Iraq by Australian US European and Asian news sources. Combining detailed text analysis with corpus linguistic methods it provides an empirical analysis showing the astonishing reach of our ideologies of war and their profoundly covert and coercive power **Analysing Scientific Discourse from A Systemic Functional Linguistic Perspective** Jing Hao, 2020-01-21 This book describes the discourse of biology from a systemic

functional linguistic perspective It offers a detailed description of resources based on text analysis The description reveals co textual patterns of language features their expressions through grammatical resources as well as their functions in the disciplinary context The book also applies the description to analyse student texts in undergraduate biology revealing characteristics of language and knowledge development Although the discussion in this book focuses on the discourse of biology both the language description and the descriptive principle can be used to inform the examination of knowledge in academic discourse in general making this key reading for students and researchers in systemic functional linguistics discourse analysis English for academic purposes applied linguistics and science education     Systemic Functional Insights on Language and Linguistics Christian M.I.M.
