Sociology and the School (RLE Edu L) Peter Woods,2012-05-16 This is an introduction to interactionist work in education during the 1970s and 80s The interactionist viewpoint concentrates on how people construct meanings in the ebb and flow of everyday life what they think and do how they react to one another and has in recent years established itself as one of the leading approaches in education It has generated illuminating research studies which by being firmly based in the real world of teaching and dealing with the fine grained details of school life have helped to break down the barriers between teacher and researcher This volume presents the results of this valuable work within a coherent theoretical framework by focusing on the major interactionist concepts of situation perspectives cultures strategies negotiation and careers By bringing them together in this way the author demonstrates their collective potential for the deeper understanding of school life and the possibilities for sociological theory His book therefore offers both a summary of and a reflection on achievement in the area of interactionism as it relates to schools

Contemporary Research in the Sociology of Education (RLE Edu L) John Eggleston,2013-05-13 The subject matter of this book what happens in schools the effects of curriculum change the reasons why some children are successful and others are not explains just why the sociology of education is one of the most important areas to achieve political importance There are five sections to the book covering Educational Achievement Educational Provision The Organization of the School Roles in the School and Values and Learning The editor discusses the implications of the material presented much of which was available for the first time when this book was originally published

Cultures of Schooling (RLE Edu L Sociology of Education) Mary Kalantzis,Bill Cope,Greg Noble,Scott Poynting,2012-05-04 This volume examines the ways schools respond to cultural and linguistic

diversity A richness of accumulated experience is portrayed in this study of six Australian secondary schools partial success near success or instructive failure as the culture of the school itself was transformed in an attempt to meet the educational needs of its students Set in the context of a general historical background to the development of multicultural education in Australia a theoretical framework is developed with which to analyze the move from the traditional curriculum of cultural assimilation to the progressivist curriculum of cultural pluralism The book analyzes the limitations of the progressivist model of multicultural education and suggests a new post progressivist model in evidence already in an incipient and as yet tentative self corrective trend in the case study schools

Educability, Schools and Ideology (RLE Edu L) MICHAEL Flude, JOHN AHIER, 2013-05-13 The sociology of education has been at the forefront of new developments in sociological theory This book examines and criticizes a number of these new developments and discusses some empirical work on issues of current concern One of the few books that integrates radical and critical sociology into the field of education it deals with the resultant difficulties The topics covered include cultural deprivation ideologies in education classrooms the teaching profession and the history of women s education

Schooling in Rural Societies (RLE Edu L) Roy Nash, 2012-05-04 In industrialized societies the needs of people living in remote and sparsely populated areas are easily overlooked whilst in developing countries the needs of the rural population are at once so obvious and so enormous that our practical concern is blunted In this volume it is clearly demonstrated that the relationship between environment and schooling is no less pertinent in rural areas than urban areas although most recent attention has been directed towards the latter Roy Nash seeks to redress the balance and in this wide ranging and comprehensive analysis he examines the educational needs of rural people both in the declining periphery of urban Europe and in the resource starved areas of the developing world

Schools, Teachers and Teaching (RLE Edu N) Len Barton, Stephen Walker, 2012-04-27 This volume considers how various sociological approaches to the exploration of the conditions of teachers might be co ordinated so as to produce a more penetrating and reliable understanding of the main dimensions of teachers work Three dimensions are selected for special attention historical institutional and interactional contexts in which teachers operate In different way the papers in this collection explore the contribution such an investigation of these contexts can make to our understanding of wider educational concerns

Race, Class and Education (RLE Edu L) Len Barton, Stephen Walker, 2012-05-04 One problem which continues to absorb social scientists is the way in which so much social deprivation stems from racial or class status The discussion in this book is developed in two ways firstly careful attention is given to an examination of the way minority groups create and maintain collective identities and action Secondly the relationship between this movement and such topics as racism in schools schooling unemployment and West Indian involvement in sporting rather than academic activities is analysed together with the nature of the educational experience of different class and gender groups

Towards Successful Schooling (RLE Edu L Sociology of Education) Hugh Lauder, Cathy Wylie, 2012-05-23 The editors have compiled this critical

and comparative study of changes which took place in the New Zealand education system in the second half of the twentieth century For other Western societies who have felt the impact of New Right policies the New Zealand case is interesting because it provides some indication of how policies of decentralization in education might be used to develop egalitarian and democratic educational policies In recent years there have been major changes to educational systems in the Western world Often these changes have been justified by reference to successful educational practices in other countries However it is not always possible simply to abstract educational practices from one context and apply them in another successfully Moreover claims that policies in one country are more successful than those in another have to be treated cautiously there are always problems in making valid comparisons between the educational performances of different countries It is important therefore that critical and comparative studies are made of educational systems which take full account of the contexts in which they are embedded *Education (RLE Edu L Sociology of Education)* Phillip Brown, Hugh Lauder, 2012-05-23

What unites the contributors to this book is an opposition to Thatcherite policies on education and an agreement upon the need for the development of democracy in education This volume highlights the importance of an area of neglected theoretical and practical concern the development of a critique of the philosophy and policies of the new Right and of credible alternative policies *Dilemmas of Schooling (RLE Edu L)* Ann Berlak, Harold Berlak, 2012-04-27 This study illuminates how the everyday activity of teachers raises profound economic cultural ethical political and research issues and provides a new and fruitful way of examining the practice of teaching The first part of the book offers a detailed description of sensitively recorded school situations arising from work carried out in a number of British primary schools From the analysis of their research the authors constructed a theoretical perspective for looking at schooling in the form of sixteen dilemmas the second half of the book is concerned with this perspective and shows how the dilemmas constitute a language for looking at everyday schooling and relating it to more general political social and cultural issues The book thus spans the gap in educational thinking between work with a firm empirical base and specifically theoretical studies **Marxist Perspectives**

in the Sociology of Education (RLE Edu L Sociology of Education) Maurice Levitas, 2012-05-04 The major theories explored are those concerned with social mobility and those which derive from a relativist position in Sociology both of which see education as a selection mechanism for a stratified society Social class family sociolinguistics and schools are among the topics discussed In this analysis the author defines key areas in the sociology of education gives access to important concepts of Marx and Engels strengthens sociological starting points by adding a Marxist element discriminates between radically different directions in education maps the main features of long term working class goals This thoroughgoing Marxist critique of widely prevalent notions in the sociology of education provides a compass by which place and direction in this area of education may be found by students teachers and parents **Marxism and Education (RLE Edu L)** Madan Sarup, 2013-05-13 This book introduces the student to the various phenomenological and humanistic Marxist perspectives as

they are being applied to education and provides an account of the strengths and weaknesses of these perspectives drawing on a variety of disciplines in order to explain the controversies described. The opening chapters deal with the phenomenological perspective in the sociology of education discussing its adoption of a phenomenological model of man its use of anthropological studies the importance of classroom studies and its rejection of the liberal philosophy of education. The aim is to show the significance of these ideas for education with a discussion of the concept of alienation and schooling developments in Marxism such as the focus on the mode of production and the labour process and the political economy of education.

Schooling, Ideology and the Curriculum (RLE Edu L) Len Barton, Roland Meighan, Stephen

Walker, 2012-04-27 Although the different contributions to this book range over a wide spectrum of substantive issues they share a common interest. This is a concern to explore the ways in which notions of the relations between theory and practice between belief and action can be used to develop three kinds of sensitivity in the sociology of education. A sensitivity towards how school systems are created maintained and made to function towards developing a more refined critical and constructive awareness of the reliability and validity of descriptions analyses and explanations offered in this field of study and a sensitivity towards the ways in which changes take place within the education system and how the insights and realisations generated in the discipline might be used to control such occurrences.

The Research Process in Educational Settings (RLE Edu L)

Robert Burgess, 2012-05-04 This book presents a series of research biographies based on research experiences in the study of educational settings. The main aim is to provide a set of first person accounts on doing research that combine analysis with description. The contributors have been drawn from the disciplines of sociology and educational studies and have all conducted ethnographic work or case studies in a variety of educational settings.

Social Control and Education (RLE Edu L)

Brian Davies, 2012-05-04 Social control is a central sociological concept which has generated many influential models of man in society. This book examines these major models and examines the rise of compulsory schooling in Britain and the USA and shows us which aspects of education and social control have been elaborated or neglected in the sociology of education down to the mid 1970s.

School Organisation (RLE Edu L)

William Tyler, 2012-05-16 The internal organisation of the school touches on many areas of contemporary debate. Is there such a thing as a good school? Are large urban comprehensives necessarily impersonal? Are the charges of indiscipline conflict and declining standards in modern schools based on a failure to understand schools as institutions? At the time this book was first published sociological analysis had neglected to consider schools as organisational entities preferring to see them as either the sites for negotiated encounters between teachers and pupils or else as agencies of class reproduction. The author redresses this imbalance and by relating the various literatures on the school to the constitutive patterns of its internal organisation he demonstrates the need for a more intensive sociological study of this embattled institution.

Marxism/Structuralism/Education (RLE Edu L)

Madan Sarup, 2012-05-04 This interdisciplinary textbook provides an introduction to the many theoretical developments and

controversies which took place in the sociology and politics of education during the 1970s and 80s The book Discusses the arguments concerning humanist and structuralist Marxism Provides a clear and concise introduction to structuralism and post structuralism work of Derrida Lacan and Foucault and theorises in the ways they contribute to Marxism or are subversive of it Relates these theoretical perspectives to education and the practice of teachers
