all foreign nations were in subjection awaiting your beck and call and the Roman people and senate released from their alarm were beginning to be guided by your most noble conceptions and policies I hardly dared in view of your serious employments to publish my writings and long considered ideas on architecture for fear of subjecting myself to your displeasure by an unseasonable interruption

*Vitruvius the Ten Books on Architecture* Vitruvius, 2022-08-04 This is a Piranesi Press limited edition reprint of *De Architectura* or *The Ten Books on Architecture* by Vitruvius This classic book is the first known book to be written on Roman and Greek architecture or classical architecture This edition is limited to 500 Copies World wide Vitruvius was a Roman General and Engineer who lived in the 1st Century AD and is thought to have served under Emperor Julius Caesar First printed in Latin by Fra Giovanni Sulpitius in Rome in 1486 this classic treatise has been translated into Italian French English German and Spanish The first illustrated edition was published in Venice in 1511 by Fra Giovanni Giocondo It contained woodcuts based on the Vitruvius descriptions Leonardo Da Vinci s famous Vitruvian man depicting a man of perfect proportions is based on the ideas of Vitruvius Vitruvius instructed that buildings must contain the elements of strength utility and beauty

**Vitruvius, the Ten Books on Architecture** Vitruvius Pollio, 1914

**Vitruvius: 'Ten Books on Architecture'** Vitruvius, 2001-01-15 The only full treatise on architecture and its related arts to survive from classical antiquity the *De Architectura libri decem* *Ten Books on Architecture* is the single most important work of architectural history in the Western world having shaped humanist architecture and the image of the architect from the Renaissance to the present This new critical edition of Vitruvius *Ten Books of Architecture* is the first to be published for an English language audience in more than half a century Expressing the range of Vitruvius style the translation along with the critical commentary and illustrations aims to shape a new image of the Vitruvius who emerges as an inventive and creative thinker rather than the normative summarizer as he was characterized in the Middle Ages and Renaissance

*Ten Books on Architecture* Vitruvius, 2019-12-25 The architect should be equipped with knowledge of many branches of study and varied kinds of learning for it is by his judgement that all work done by the other arts is put to test This knowledge is the child of practice and theory Practice is the continuous and regular exercise of employment where manual work is done with any necessary material according to the design of a drawing Theory on the other hand is the ability to demonstrate and explain the productions of dexterity on the principles of proportion 1 While your divine intelligence and will Imperator Caesar were engaged in acquiring the right to command the world and while your fellow citizens when all their enemies had been laid low by your invincible valour were glorying in your triumph and victory while all foreign nations were in subjection awaiting your beck and call and the Roman people and senate released from their alarm were beginning to be guided by your most noble conceptions and policies I hardly dared in view of your serious employments to publish my writings and long considered ideas on architecture for fear of subjecting myself to your displeasure by an unseasonable interruption 2 But when I saw that you were giving your attention not only to the welfare of society in general and to the establishment of public

order but also to the providing of public buildings intended for utilitarian purposes so that not only should the State have been enriched with provinces by your means but that the greatness of its power might likewise be attended with distinguished authority in its public buildings I thought that I ought to take the first opportunity to lay before you my writings on this theme For in the first place it was this subject which made me known to your father to whom I was devoted on account of his great qualities After the council of heaven gave him a place in the dwellings of immortal life and transferred your father s power to your hands my devotion continuing unchanged as I remembered him inclined me to support you And so with Marcus Aurelius Publius Minidius and Gnaeus Cornelius I was ready to supply and repair ballistae scorpiones and other artillery and I have received rewards for good service with them After your first bestowal of these upon me you continued to renew them on the recommendation of your sister 3 Owing to this favour I need have no fear of want to the end of my life and being thus laid under obligation I began to write this work for you because I saw that you have built and are now building extensively and that in future also you will take care that our public and private buildings shall be worthy to go down to posterity by the side of your other splendid achievements I have drawn up definite rules to enable you by observing them to have personal knowledge of the quality both of existing buildings and of those which are yet to be constructed For in the following books I have disclosed all the principles of the art

Vitruvius Indra Kagis McEwen,2004-09-17 A historical study of Vitruvius s *De architectura* showing that his purpose in writing the whole body of architecture was shaped by the imperial Roman project of world domination Vitruvius s *De architectura* is the only major work on architecture to survive from classical antiquity and until the eighteenth century it was the text to which all other architectural treatises referred While European classicists have focused on the factual truth of the text itself English speaking architects and architectural theorists have viewed it as a timeless source of valuable metaphors Departing from both perspectives Indra Kagis McEwen examines the work s meaning and significance in its own time Vitruvius dedicated *De architectura* to his patron Augustus Caesar the first Roman emperor whose rise to power inspired its composition near the end of the first century B C McEwen argues that the imperial project of world dominion shaped Vitruvius s purpose in writing what he calls the whole body of architecture Specifically Vitruvius s aim was to present his discipline as the means for making the emperor s body congruent with the imagined body of the world he would rule Each of the book s four chapters treats a different Vitruvian body Chapter 1 The Angelic Body deals with the book as a book in terms of contemporary events and thought particularly Stoicism and Stoic theories of language Chapter 2 The Herculean Body addresses the book s and its author s relation to Augustus whose double Vitruvius means the architect to be Chapter 3 The Body Beautiful discusses the relation of proportion and geometry to architectural beauty and the role of beauty in forging the new world order Finally Chapter 4 The Body of the King explores the nature and unprecedented extent of Augustan building programs Included is an examination of the famous statue of Augustus from Prima Porta sculpted soon after the appearance of *De architectura*
