The Late Byzantine Army Mark C. Bartusis, 2015-12-22 The late Byzantine period was a time characterized by both civil strife and foreign invasion framed by two cataclysmic events the fall of Constantinople to the western Europeans in 1204 and again to the Ottoman Turks in 1453 Mark C Bartusis here opens an extraordinary window on the Byzantine Empire during its last centuries by providing the first comprehensive treatment of the dying empire's military Although the Byzantine army was highly visible it was increasingly ineffective in preventing the incursion of western European crusaders into the Aegean the advance of the Ottoman Turks into Europe and the slow decline and eventual fall of the thousand year Byzantine Empire Using all the available Greek western European Slavic and Turkish sources Bartusis describes the evolution of the army both as an institution and as an instrument of imperial policy He considers the army's size organization administration and the varieties of soldiers and he examines Byzantine feudalism and the army's impact on society and the economy In its extensive use of soldier companies composed of foreign mercenaries the Byzantine army had many parallels with those of western Europe in the final analysis Bartusis contends the death of Byzantium was attributable more to a shrinking fiscal base than to any lack of creative military thinking on the part of its leaders **Warfare in Late Byzantium, 1204-1453** Savvas

Best known as Constantine the Great the kind of moniker only earned by rulers who have distinguished themselves in battle and conquest Constantine remains an influential and controversial figure to this day He achieved enduring fame by being the first Roman emperor to personally convert to Christianity and for his notorious Edict of Milan the imperial decree which legalized the worship of Christ and promoted religious freedom throughout the Empire More than 1500 years after Constantine's death Abdu'l-Bah the head of the Bahá'í Faith wrote His blessed name shines out across the dawn of history like the morning star and his rank and fame among the world's noblest and most highly civilized is still on the tongues of Christians of all denominations However it can be argued that despite his military successes the most notable of which occurred fighting for supremacy against other Romans Constantine may well have set the stage for the ultimate collapse of the Roman Empire as it had existed up until that point It was Constantine who first decided that Rome exposed and vulnerable near the gathering masses of barbarians moving into Germania and Gaul was a strategically unsafe base for the Empire and thus expanded the city of New Rome on the Dardanelles straits creating what eventually became Constantinople By moving the political administrative and military capital of the Empire from Rome to the East as well as the Imperial court with all its attendant followers Constantine laid the groundwork for the eventual schism which saw the two parts of the Roman Empire become two entirely separate entities go their own way and eventually collapse piecemeal under repeated waves of invasion As a result the Byzantine Empire was the heir to two great cultures that cradled and nurtured European civilization Greece and Rome Constantinople now called Istanbul became a center of power culture trade and technology poised on the edges of Europe and Asia and its influence was felt not only throughout Europe but the Middle East Africa Central Asia and the Far East Coins dating from the reign of Emperor Justinian I r 527-565 have been found in southern India and Chinese records show that the Fulin as the Chinese named the Byzantines were received at court as early as 643 CE For a thousand years the Byzantine Empire protected Europe from the Islamic Arab Empire allowing it to pursue its own destiny Finally Byzantium was a polyglot society in which a multitude of ethnic groups lived under the emperor prizing peace above war an inspiration surely for the modern age when divisive nationalism threatens to dominate society once more Despite all this the Byzantine Empire is often treated as a medieval oddity an absolute state stunted by a myopic religion a corrupt labyrinthine bureaucracy and an inability to adapt to change In truth none of these judgments bear any serious scrutiny Byzantium was a strong organized highly effective and adaptable civilization for most of its long history It owed its success in no small part to its military which in contrast to the feudal armies of Western Europe and the tribally based forces of the Middle East operated with a high level of discipline strategic prowess efficiency and organization The Byzantine Army The History and Legacy of the Byzantine Empire's Military during the Middle Ages examines the history of the Byzantine military machine why it was so successful and why in the end it failed to preserve a civilization that had lasted a thousand years
