The Hazards of Urban Life in Late Stalinist Russia Donald A. Filtzer, 2014-05-14 This is the first detailed study of the standard of living of ordinary Russians following World War II It examines urban living conditions under the Stalinist regime with a focus on the key issues of sanitation access to safe water supplies personal hygiene and anti epidemic controls diet and nutrition and infant mortality Comparing five key industrial regions it shows that living conditions still lagged some fifty years behind Western European norms The book reveals that despite this the years preceding Stalin's death saw dramatic improvements in mortality rates thanks to the application of rigorous public health controls and Western medical innovations While tracing these changes the book also analyzes the impact that the absence of an adequate urban infrastructure had on people's daily lives and on the relationship between the Stalinist regime and the Russian people and finally how the Soviet experience compared to that of earlier industrializing societies

Russia's Long Twentieth Century Choi Chatterjee, Lisa A. Kirschenbaum, Deborah A. Field, 2016-05-20 Covering the sweep of Russian history from empire to Soviet Union to post Soviet state Russia's Long Twentieth Century is a comprehensive yet accessible textbook that situates modern Russia in the context of world history and encourages students to analyse the ways in which citizens learnt to live within its system and create distinctly Soviet identities from its structures and ideologies Chronologically organised but moving beyond the traditional Cold War framework this book covers topics such as the accelerating social economic and political shifts in the Russian empire before the Revolution of 1905 the construction of the socialist order under Bolshevik government and the development of a new state structure political ideology and foreign policy in the decades since the collapse of the Soviet Union The authors highlight the polemics and disagreements that energize the field discussing interpretations from Russian migr and Western

historiographies and showing how scholars diverge sharply in their understanding of key events historical processes and personalities Each chapter contains a selection of primary sources and discussion questions engaging with the voices and experiences of ordinary Soviet citizens and familiarizing students with the techniques of source criticism Illustrated with images and maps throughout this book is an essential introduction to twentieth century Russian history **Stalinist Reconstruction and the Confirmation of a New Elite, 1945-1953** E. Duskin, 2001-03-08 Stalinist Reconstruction and the Confrontation of a New Elite 1945-53 looks at the postwar Stalin era through the eyes of industrial supervisors and offers a picture of the technical intelligentsia's transformation into the Soviet Union's social and political elite Drawing from archives newspapers memoirs and an array of secondary sources the book reveals new aspects of the Stalin phenomenon and concludes that contrary to prior assumptions the late Stalin years marked the Soviet Union's passage from the convulsion and disorder of revolution to the routinized professionalization common to most industrial societies **The Private World of Soviet Scientists from Stalin to Gorbachev** Maria Rogacheva, 2017-07-10 Rogacheva sheds new light on the complex transition of Soviet society from Stalinism into the post Stalin era Using the case study of Chernogolovka one of dozens of scientific towns built in the USSR under Khrushchev she explains what motivated scientists to participate in the Soviet project during the Cold War Rogacheva traces the history of this scientific community from its creation in 1956 through the Brezhnev period to paint a nuanced portrait of the living conditions political outlook and mentality of the local scientific intelligentsia Utilizing new archival materials and an extensive oral history project this book argues that Soviet scientists were not merely bought off by the Soviet state but that they bought into the idealism and social optimism of the post Stalin regime Many shared the regime's belief in the progressive development of Soviet society on a scientific basis and embraced their increased autonomy material privileges and elite status **Saving Stalin's Imperial City** Steven Maddox, 2014-12-18 Succeeds in explaining how and why a war ravaged city suffering acute shortages invested its scant resources in protecting and reconstructing monuments Slavonic and East European Review Saving Stalin's Imperial City is the history of the successes and failures in historic preservation and of Leningraders' determination to honor the memory of the terrible siege the city had endured during World War II The book stresses the counterintuitive nature of Stalinist policies which allocated scarce wartime resources to save historic monuments of the tsarist and imperial past even as the very existence of the Soviet state was being threatened and again after the war when housing hospitals and schools needed to be rebuilt Postwar Leningrad was at the forefront of a concerted restoration effort fueled by commemorations that glorified the city's wartime experience encouraged civic pride and mobilized residents to rebuild their hometown For Leningrad the restoration of monuments and commemorations of the siege were intimately intertwined served similar purposes and were mutually reinforcing A most welcome addition to the historiography of Europe's bombed cities and their reconstruction after World War II Journal of Modern History **Stalin and Mao** Lucien Bianco, 2018-03-15 China's ascent to the ranks of the world's

second largest economic power has given its revolution a better image than that of its Russian counterpart Yet the two have a great deal in common Indeed the Chinese revolution was a carbon copy of its predecessor until Mao became aware not so much of the failures of the Russian model but of its inability to adapt to an overcrowded third world country Yet instead of correcting that model Mao decided to go further and faster in the same direction The aftershock of an earthquake may be weaker but the Great Leap Forward of 1958 in China was far more destructive than the Great Turn of 1929 in the Soviet Union It was conceived with an idealistic end but failed to take all the possibilities into account China's development only took off after and thanks to Mao's death once the country turned its back on the revolution Lucien Bianco's original comparative study highlights the similarities the all powerful bureaucracy the over exploitation of the peasantry which triggered two of the worst famines of the 20th century control over writers and artists repression and labor camps The comparison of Stalin and Mao that completes the picture leads the author straight back to Lenin and he quotes the observation by a Chinese historian that If at all possible it is best to avoid revolutions altogether

Replacing the Dead Mie Nakachi, 2021 In 1955 the Soviet Union became the first country in the world to re-legalize abortion on the principle of women's rights to abortion. How could this happen in Stalinist society which prohibited feminist movements? *Replacing the Dead* finds an answer in previously secret archives that document the difficult decade after World War II which killed 27 million Soviet citizens and the government's policy to increase fertility by promoting out-of-wedlock births. The result was an abortion battle between women, government and Soviet legal and medical professionals that has continued for decades.

Stalinist Society Mark Edele, 2011-02-17 Stalinist Society offers a fresh analytical overview of the complex social formation ruled over by Stalin and his henchmen from the late 1920s to the early 1950s. Drawing on declassified archival materials, interviews with former Soviet citizens, old and new memoirs and personal diaries, as well as the best of sixty years of scholarship, this book offers a non-reductionist account of social upheaval and social cohesion in a society marred by violence. Combining the perspectives from above and from below, the book integrates recent writing on everyday life, culture and entertainment, ideology and politics, terror and welfare, consumption and economics. Utilizing the latest archival research on the evolution of Soviet society during and after World War II, this study also integrates the entire history of Stalinism from the late 1920s to the dictator's death in 1953. Breaking radically with current scholarly consensus, Mark Edele shows that it was not ideology, terror or state control which held this society together, but the harsh realities of making a living in a chaotic economy which the rulers claimed to plan and control, but which in fact they could only manage haphazardly.

A Full-Value Ruble Kristy Ironside, 2021-06-01 A new history shows that despite Marxism's rejection of money, the ruble was critical to the Soviet Union's promise of shared prosperity for its citizens. In spite of Karl Marx's proclamation that money would become obsolete under Communism, the ruble remained a key feature of Soviet life. In fact, although Western economists typically concluded that money ultimately played a limited role in the Soviet Union, Kristy Ironside argues that money was both more important and more powerful than most histories have recognized. After the Second World War, money was resurrected as an essential tool of Soviet governance. Certainly its importance was not lost on Soviet leaders despite official Communist Party dogma. Money, Ironside demonstrates, mediated the relationship between the Soviet state and its citizens and was at the center of both the government's and the people's visions for the maturing Communist project. A strong ruble, one that held real value in workers' hands and served as an effective labor incentive, was seen as essential to the economic growth that would rebuild society and realize Communism's promised future of abundance. Ironside shows how Soviet citizens turned to the state to remedy the damage that the ravages of the Second World War had inflicted upon their household economies. From the late 1940s through the early 1960s, progress toward Communism was increasingly measured by the health of its citizens' personal finances, such as greater purchasing power, higher wages, better pensions and growing savings. However, the increasing importance of money in Soviet life did not necessarily correlate to

improved living standards for Soviet citizens The Soviet government's achievements in raising the people's material welfare continued to lag behind the West's advances during a period of unprecedented affluence These factors combined to undermine popular support for Soviet power and confidence in the Communist project

Dying Unneeded Michelle Parsons, 2014-06-12 In the early 1990s Russia experienced one of the most extreme increases in mortality in modern history Men's life expectancy dropped by six years women's life expectancy dropped by three Middle aged men living in Moscow were particularly at risk of dying early deaths While the early 1990s represent the apex of mortality the crisis continues Drawing on fieldwork in the capital city during 2006 and 2007 this account brings ethnography to bear on a topic that has until recently been the province of epidemiology and demography Middle aged Muscovites talk about being unneeded *ne nuzhny* or having little to give others Considering this concept of being unneeded reveals how political economic transformation undermined the logic of social relations whereby individuals used their position within the Soviet state to give things to other people Being unneeded is also gendered while women are still needed by their families men are often unneeded by state or family Western literature on the mortality crisis focuses on a lack of social capital often assuming that what individuals receive is most important but being needed is more about what individuals give Social connections and their influence on health are culturally specific In Soviet times needed people helped friends and acquaintances push against the limits of the state crafting a sense of space and freedom When the state collapsed this sense of bounded freedom was compromised and another freedom became deadly This book is a recipient of the annual Norman L and Roselea J Goldberg Prize for the best project in the area of medicine

A Sacred Space Is Never Empty Victoria Smolkin, 2018-05-22 When the Bolsheviks set out to build a new world in the wake of the Russian Revolution they expected religion to die off Soviet power used a variety of tools from education to propaganda to terror to turn its vision of a Communist world without religion into reality Yet even with its monopoly on ideology and power the Soviet Communist Party never succeeded in overcoming religion and creating an atheist society A Sacred Space Is Never Empty presents the first history of Soviet atheism from the 1917 revolution to the dissolution of the Soviet Union in 1991 Drawing on a wealth of archival material and in depth interviews with those who were on the front lines of Communist ideological campaigns Victoria Smolkin argues that to understand the Soviet experiment we must make sense of Soviet atheism Smolkin shows how atheism was reimagined as an alternative cosmology with its own set of positive beliefs practices and spiritual commitments Through its engagements with religion the Soviet leadership realized that removing religion from the sacred spaces of Soviet life was not enough Then in the final years of the Soviet experiment Mikhail Gorbachev in a stunning and unexpected reversal abandoned atheism and reintroduced religion into Soviet public life A Sacred Space Is Never Empty explores the meaning of atheism for religious life for Communist ideology and for Soviet politics
