Latin American Special Economic Zones And Their Impacts On Regional Security:

Latin American Special Economic Zones and Their Impacts on Regional Security Richard R. Reyes, 2011 Latin America is often considered the United States strategic backyard. However, with the advent of globalization and technology, this backyard is no longer strictly American. As the region becomes more accessible and readily influenced by external actors and the United States security concerns focus elsewhere, a growing opportunity is present in the Western Hemisphere for organized criminal networks and terror financing to take hold. Although globalization provides Latin American nations with ties to the world economy, it comes at a price for regional security. One of the most vulnerable products of a globalized Latin America is the Special Economic Zones in the region. Special Economic Zones (SEZs) throughout Latin America represent the delicate seesaw game that globalization and security play. Although SEZs attract foreign direct investment, fuel jobs, and grow linkages in local economies, they are also extremely vulnerable to crime and corruption. The entrenched permissive environment for criminal activity and links to transnational terrorism is a serious issue for regional and global security. This paper will examine the vulnerabilities of SEZs in Latin America through a comparative case study approach of the Colon Free Zone and the Triple State Border Area (Zona Franca de Ciudad del Este).

The Complex Environments of Special Economic Zones Alessia Berni, 2025-02-26 This book presents a comprehensive framework for understanding Special Economic Zones (SEZs) as a powerful tool for regional development, stimulating investment, creating employment opportunities, and supporting economic growth through tax incentives and other benefits. It explores the relationships between academic institutions, industry policymakers, and institutional actors and highlights how collaborations between public and private sectors drive economic growth. The book further provides insights into how these zones foster innovation, attract foreign investment, and promote regional advancement through an in-depth analysis of SEZ types such as export processing zones, free trade zones, and high tech parks. Drawing on global case studies, the book identifies key governance structures and labor policies that enhance SEZ performance. It also examines how strategic interventions can address labor market challenges, especially in developing countries. The book will appeal to scholars, policymakers, and stakeholders seeking to understand the role of SEZs in economic and employment growth worldwide.

Contemporary South Africa and the Political Economy of Regional Development Methembe Mdlalose, Isaac Khambule, Nene Ernest Khalema, 2025-02-21 South Africa's struggle in balancing its domestic needs while playing a dynamic developmental role in the African region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid. As such, understanding the complexities of the global economy and of South Africa's place in it is of great importance. This book builds upon an existing body of literature which has demonstrated that while the post-apartheid South African state has recast its nation building goals with advances having been made notably in the area of a stellar post-apartheid constitution, policy directives, and democratic political integration, economic integration, and policy implementation.

presents a projection of captured interests where big business concerns are entrenched in the post apartheid state s apparent neo liberal turn The main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for South Africa and indeed for the study of the political economy of regional development in the country from the prism of South Africa as a global capitalist state These trends include the impact of globalisation regionalisation and the marginalisation of South Africa and indeed the African continent in the global economy thus unpacking the possible role that South Africa might play in regional development This volume will be a valuable resource to academics researchers and students in the fields of regional studies economics and political theory as well as policymakers planners and local economic development practitioners

Transnational Crime and Black Spots

Stuart S. Brown, Margaret G. Hermann, 2019-10-29 The strength of this book is that it does not look at a single case or even a few disparate examples of drug weapon and human trafficking but looks at many patterns intra regionally cross nationally and internationally It is an innovative addition to the literature on the nature of the safe havens or black spots currently being used for illicit activity This book will make a clear impact on the scholarship of transnational crime and the geopolitics of the illicit global economy Jeremy Morris Aarhus University Denmark Transnational criminal insurgent and terrorist organizations seek places that they can govern and operate from with minimum interference from law enforcement This book examines 80 such safe havens which function outside effective state based government control and are sustained by illicit economic activities Brown and Hermann call these geographic locations black spots because like black holes in astronomy that defy the laws of Newtonian physics they defy the world as defined by the Westphalian state system The authors map flows of insecurity such as trafficking in drugs weapons and people providing an unusually clear view of the hubs and networks that form as a result As transnational crime is increasing on the internet Brown and Hermann also explore if there are places in cyberspace which can be considered black spots They conclude by elaborating the challenges that black spots pose for law enforcement and both national and international governance
