Tourism Case Studies Latin America Region Thiago Allis, Sandro Carnicelli, 2024-11-21 Latin America is a complex mosaic of nations people and landscapes with unique cultural scenic and economic resources but with no more than 6% of global international tourist arrivals World Bank 2019 The region hosts several top international destinations such as the Caribbean islands and the sacred city of the Incas Machu Picchu Peru Cities like São Paulo and Mexico City are internationally known for their Meetings Incentives Conferences and Exhibitions MICE sector Galapagos Ecuador and Fernando de Noronha Brazil are areas of significant ecological importance However even if some of the destinations are well known internationally the region is still seen as an untouched source for tourism at global and regional scales Moreover the region is still underrepresented in international tourism literature and content for pedagogical and educational purposes still limited This gap needs to be filled to help inform tourism developments and to better educate the next generation This can help shift students and practitioners away from an over dependence on models and ideas developed and tested in different social and cultural settings that may not be appropriate for a Latin American context Therefore this book aims to bring together researchers students practitioners and other agents involved with research teaching and the operation of tourism to share their research and work experiences in Latin America in the form of case studies focusing on real world examples

The Lover's Tongue Mark Morton, 2009 This delightful book includes over 100 mini essays explaining the origins and historical development of words in our language that pertain to love and sex Do you know for example what a 78 is Here is a hint like the old 78 rpm records the term refers to a man who is well on the fast side Diligently researched The Lover's Tongue is written in a light hearted style A dictionary of a different kind this book is the perfect gift for that special someone or for the connoisseur of language and history in your life

The Storm-petrels Rob Thomas, 2024-07-25 The first definitive work on the European Storm petrel and its relatives by one of the world's leading experts on the species Imagine a bird as small as a sparrow which lives most of its life on the open ocean yet can survive for decades It walks on water and migrates half way around the world returning to remote islands to breed underground often in the same rock crevice each year At night it lays an enormous egg feeding its chick until the nestling weighs more than both parents put together It seems to have little fear of humans but was itself feared by ancient seafarers This might sound like

the stuff of legend but is actually the description of a real creature the storm petrel walker on water global wanderer climate sentinel and open ocean survivor In this beautifully written monograph Rob Thomas explores the remarkable life of the European Storm petrel comparing and contrasting its behaviour and ecology across its range and with the other storm petrels of the world We learn about their evolution taxonomy migration and adaptations to a life in the harsh open ocean while also discovering what these enigmatic seabirds are revealing about what humans are doing to our planet Illustrated with 150 photographs and including the author s personal anecdotes and observations Storm petrels highlights some of the most exciting recent research findings and sets a trajectory for future discoveries

Five Birds of Latin America Lillian Cox Athey,1946 *The Birds of the Latin Poets* Ernest Whitney Martin,1914 *Birds of empire, birds of nation : a history of science, economy, and conservation in United States-Colombia relations* Quintero Toro, Camilo,2012-09-01 This book reveals the history behind the trade of Colombian birds as a means of comprehending the scientific economic and environmental relations between the United States and Colombia from the 1880s to the 1960s Through the study of the feather trade scientific expeditions scientific communities and nature conservation the author brings to light how international relations and national agendas shaped the study and perception of nature in both countries during those years

A.L.A. Catalog ,1904 What Species Mean Julia D. Sigwart,2018-10-29 Everyone uses species All human cultures whether using science or not name species Species are the basic units for science from ecosystems to model organisms Yet there are communication gaps between the scientists who name species called taxonomists or systematists and those who

use species names everyone else This book opens the black box of species names to explain the tricks of the name makers to the name users Species are real and have macroevolutionary meaning and it follows that systematists use a broadly macroevolution oriented approach in describing diversity But scientific names are used by all areas of science including many fields such as ecology that focus on timescales more dominated by microevolutionary processes This book explores why different groups of scientists understand and use the names given to species in very different ways and the consequences for measuring and understanding biodiversity Key selling features Explains the modern multi disciplinary approach to studying species evolution and species discovery and the role of species names in diverse fields throughout the life sciences Documents the importance and urgent need for high quality taxonomic work to address today s most pressing problems Summarises controversies in combining different sometimes quite different datasets used to estimate global biodiversity Focusses throughout on a central theme the disconnect between the makers and the users of names and seeks to create the rhetorical foundation needed to bridge this disconnect Anticipates the future of taxonomy and its role in studies of global biodiversity

The Cornhill Magazine George Smith, William Makepeace Thackeray, 1875 Bird Books and Bird Art J. Anker, 2014-11-14 Birds Useful and Birds Harmful Ottó Herman, Jean Allan Owen, Mrs. Visger Jean Allan (Pinder) Owen, 1909 Non-Elegiac Latin Love Poetry of Late Antiquity Vasileios Pappas, 2025-05-19 For about five hundred years between Ovid s death 17 AD and Maximianus Elegies 6th century AD the genre of love elegy disappears Does this mean that love poetry in general was no longer being written This was certainly not the case Poets continued to compose love poetry merely in other forms than elegy This book deals with non elegiac Latin love poetry of Late Antiquity It is the first monograph to focus on the metaliterary interpretation of four non elegiac poetic works the *Pervigilium Veneris* Ausonius Bissula *Reposianus De concubitu Martis et Veneris* and the *Aegritudo Perdicae* The book contains all the required information about these poems including their date authorship structure and literary tradition However its content is predominantly original as it examines subjects that have not previously been discussed in the past These include a the generic interaction between the poems host genre and several guest genres that are present within them b the metaliterary discourse developed in several passages which reveals the metapoetic self consciousness of their poets c their hidden demands for the innovation of love poetry and d their allusive comments on the conservatism of this era

Ghost Birds Stephen Lyn Bales, 2010-10-21 Everyone who is interested in the ivory billed woodpecker will want to read this book from scientists who wish to examine the data from all the places Tanner explored to the average person who just wants to read a compelling story Tim Gallagher author of *The Grail Bird The Rediscovery of the Ivory billed Woodpecker* In 1935 naturalist James T Tanner was a twenty one year old graduate student when he saw his first ivory billed woodpecker one of America s rarest birds in a remote swamp in northern Louisiana At the time he was part of an ambitious expedition traveling across the country to record and photograph as many avian species as possible a trip organized by Dr Arthur Allen

founder of the famed Cornell Lab of Ornithology Two years later Tanner hit the road again this time by himself and in search of only one species that ever elusive ivory bill Sponsored by Cornell and the Audubon Society Jim Tanner s work would result in some of the most extensive field research ever conducted on the magnificent woodpecker Drawing on Tanner s personal journals and written with the cooperation of his widow Nancy Ghost Birds recounts in fascinating detail the scientist s dogged quest for the ivory bill as he chased down leads in eight southern states With Stephen Lyn Bales as our guide we experience the same awe and excitement that Tanner felt when he returned to the Louisiana wetland he had visited earlier and was able to observe and document several of the ghost birds including a nestling that he handled banded and photographed at close range Investigating the ivory bill was particularly urgent because it was a fast vanishing species the victim of indiscriminant specimen hunting and widespread logging that was destroying its habitat As sightings became rarer and rarer in the decades following Tanner s remarkable research the bird was feared to have become extinct Since 2005 reports of sightings in Arkansas and Florida made headlines and have given new hope to ornithologists and bird lovers although extensive subsequent investigations have yet to produce definitive confirmation Before he died in 1991 Jim Tanner himself had come to believe that the majestic woodpeckers were probably gone forever but he remained hopeful that someone would prove him wrong This book fully captures Tanner s determined spirit as he tracked down what was then as now one of ornithology s true Holy Grails STEPHEN LYN BALES is a naturalist at the Ijams Nature Center in Knoxville Tennessee He is the author of Natural Histories published by UT Press in 2007 *The Quartier Latin* Trist Wood,1898
