Hoover,William E. Tunmer,2020-06-09 This book serves as a succinct resource on the cognitive requirements of reading It provides a coherent overall view of reading and learning to read and does so in a relatively sparse fashion that supports retention The initial sections of the book describe the cognitive structure of reading and the cognitive foundation upon which that structure is built This is followed by discussions of how an understanding of these cognitive requirements can be used in practice with standards assessments curriculum and instruction to advance the teaching of reading and the delivery of interventions for students who encounter difficulties along the way The book focuses on reading in English as its exemplar but shows how its framework can be adapted to understand the broad cognitive requirements for reading and learning to read in any phonologically based orthography It provides a way

for reading professionals to think about reading and its development and gives them mechanisms that coupled with such understanding will help them link what children must know to become strong readers to what teaching can best provide through the competent use of available tools In this way the book will help reading professionals be both efficient and effective in what they provide all their students and be much better equipped to support those students who struggle to learn to read
