Mapping The Invisible Landscape Folklore Writing And The Sense Of Place:

Mapping the Invisible Landscape Kent C. Ryden, 1993 Any landscape has an unseen component a subjective component of experience memory and narrative which people familiar with the place understand to be an integral part of its geography but which outsiders may not suspect the existence of Unless they listen and read carefully This invisible landscape is made visible through stories and these stories are the focus of this engrossing book Traveling across the invisible landscape in which we imaginatively dwell Kent Ryden himself a most careful listener and reader asks the following questions What categories of meaning do we read into our surroundings What forms of expression serve as the most reliable maps to understanding those meanings Our sense of any place he argues consists of a deeply ingrained experiential knowledge of its physical makeup an awareness of its communal and personal history a sense of our identity as being inextricably bound up with its events and ways of life and an emotional reaction positive or negative to its meanings and memories Ryden demonstrates that both folk and literary narratives about place bear a striking thematic and stylistic resemblance Accordingly Mapping the Invisible Landscape examines both kinds of narratives For his oral materials Ryden provides an in depth analysis of narratives collected in the Coeur d Alene mining district in the Idaho panhandle for his consideration of written works he explores the OC essay of place OCO the personal essay which takes as its subject a particular place and a writer s relationship to that place Drawing on methods and materials from geography folklore and literature Mapping the Invisible Landscape offers a broadly interdisciplinary analysis of the way we situate ourselves imaginatively in the landscape the way we inscribe its surface with stories Written in an extremely engaging style this book will lead its readers to an awareness of the vital role that a sense of place plays in the formation of local cultures to an understanding of the many layered ways in which place interacts with individual lives and to renewed appreciation of the places in their own lives and landscapes

Mapping the Invisible Landscape Kent C. Ryden, 1993 The Devil from over the Sea Sarah Covington, 2022-03-24 In Ireland few figures have generated more hatred than Oliver Cromwell whose seventeenth century conquest massacres and dispossessions would endure in the social memory for ages to come The Devil from over the Sea explores the many ways in which Cromwell was remembered and sometimes conveniently forgotten in historical religious political and literary texts according to the interests of different communities across time Cromwell s powerful afterlife in Ireland however cannot be understood without also investigating his presence in folklore and the landscape in ruins and curses Nor can he be separated from the idea of the Cromwellian a term which came to elicit an entire chain of contemptuous associations that would begin after his invasion and assume a wholly new force in the nineteenth century What emerges from all these memorializing traces is a multitudinous Cromwell who could be represented as brutal comic sympathetic or satanic He could be discarded also tellingly from the accounts of the past and especially by those which viewed him as an embarrassment or worse In addition to exploring the many reasons why Cromwell was so vehemently

remembered or forgotten in Ireland Sarah Covington finally uncovers the larger truths conveyed by sometimes fanciful or invented accounts Contrary to being damaging examples of myth making the memorializations contained in martyrologies folk tales or newspaper polemics were often productive in cohering communities or in displaying agency in the form of counter memories that claimed Cromwell for their own and reshaped Irish history in the process *Encyclopedia of American Folklife* Simon J Bronner,2015-03-04 American folklife is steeped in world cultures or invented as new culture always evolving yet often practiced as it was created many years or even centuries ago This fascinating encyclopedia explores the rich and varied cultural traditions of folklife in America from barn raisings to the Internet tattoos and Zydeco through expressions that include ritual custom crafts architecture food clothing and art Featuring more than 350 A Z entries Encyclopedia of American Folklife is wide ranging and inclusive Entries cover major cities and urban centers new and established immigrant groups as well as native Americans American territories such as Guam and Samoa major issues such as education and intellectual property and expressions of material culture such as homes dress food and crafts This encyclopedia covers notable folklife areas as well as general regional categories It addresses religious groups reflecting diversity within groups such as the Amish and the Jews age groups both old age and youth gangs and contemporary folk groups skateboarders and psychobillies placing all of them in the vivid tapestry of folklife in America In addition this resource offers useful insights on folklife concepts through entries such as community and group and tradition and culture The set also features complete indexes in each volume as well as a bibliography for further research *The Geography of Beer* Mark Patterson,Nancy Hoalst-Pullen,2014-03-15 This edited collection examines the various influences relationships and developments beer has had from distinctly spatial perspectives The chapters explore the functions of beer and brewing from unique and sometimes overlapping historical economic cultural environmental and physical viewpoints Topics from authors both geographers and non geographers alike have examined the influence of beer throughout history the migration of beer on local to global scales the dichotomous nature of global production and craft brewing the neolocalism of craft beers and the influence local geography has had on beer s most essential ingredients water starch malt hops and yeast At the core of each chapter remains the integration of spatial perspectives to effectively map the identity changes challenges patterns and locales of the geographies of beer Teaching About Place Laird Christensen,Hal Crimmel-Eds,2008-02-28 The sixteen essays in this anthology describe the practice of teaching about place with the goal of inspiring educators as well as other readers to discover the value of close investigation of their own places The contributors discuss places from the desert river canyons of the American West to the bayous of Texas to wildlife refuges on the Atlantic Coast to New England s forests and river and back to the wildland urban interface in suburban Southern California These essays reveal broader lessons about the possibilities and limitations that come with teaching about place and inhabiting our own places outside the classroom Contributors include Ann Zwinger Bradley John Monsma SueEllen Campbell Terrell Dixon and John Elder **The**

Garlic Capital of the World Pauline Adema, 2010-02-17 According to Pauline Adema you smell Gilroy California before you see it In *Garlic Capital of the World* the folklorist and culinary anthropologist examines the role of food and festivals in creating a place brand or marketable identity The author scrutinizes how Gilroy California successfully transformed a negative association with the pungent bulb into a highly successful tourism and marketing campaign This book explores how local initiatives led to an iconization of the humble product in Gilroy The city a well established agricultural center and bedroom community south of San Francisco rapidly built a place brand identity based on its now famous moniker Garlic Capital of the World To understand Gilroy s success in transforming a local crop into a tourist draw Adema contrasts the development of this now thriving festival with events surrounding the launch and demise of the PigFest in Coppell Texas Indeed the Garlic Festival is so successful that the event is all that many people know about Gilroy Adema explores the creation and subsequent selling of foodscapes or food themed place identities This seemingly ubiquitous practice is readily visible across the country at festivals celebrating edibles like tomatoes peaches spinach and even cauliflower Food Adema contends is an attractive focus for image makers charged with community building and place differentiation Not only is it good to eat food

Tourism and National Identity Elspeth Frew,Leanne

White,2011-03-15 This is the first volume to fully explore the relationship between Tourism and National Identity and multiple ways in which cultural tourism events and celebrations contribute to national identity By doing so the book provides important insights into how planners and managers can better manage attractions and events in the future The book achieves this by reviewing core topics critical to the understanding of this relationship including tourism branding stereotyping and national identity tourism related representation and experience of national identity such as when tourists travel to particular nations and what this means in relation to their identity tourism visitation site event management and the relationship to cultural tourism The book looks at a range of international tourist sites and events combines multidisciplinary perspectives and international cases to provide a solid thorough academic analysis Written by an international team of leading academics this book will be of interest to students researchers academics in Tourism and related disciplines such as Events and Cultural Geography *Hard As the Rock Itself* David Robertson,2011-05-18 The first intensive analysis of sense of place in American mining towns *Hard as the Rock Itself* Place and Identity in the American Mining Town provides rare insight into the struggles and rewards of life in these communities David Robertson contends that these communities often characterized in scholarly and literary works as derelict as sources of debasing moral influence and as scenes of environmental decay have a strong and enduring sense of place and have even embraced some of the signs of so called dereliction Robertson documents the history of Toluca Illinois Cokedale Colorado and Picher Oklahoma from the mineral discovery phase through mine closure telling for the first time how these century old mining towns have survived and how sense of place has played a vital role Acknowledging the hardships that mining s social environmental and economic legacies have created for current residents Robertson argues that the industry s influences also have contributed to the creation of strong cohesive communities in which residents have always identified with the severe landscape and challenging but rewarding way of life Robertson contends that the tough unpretentious appearance of mining landscapes mirrors qualities that residents value in themselves confirming that a strong sense of place in mining regions as elsewhere is not necessarily wedded to an attractive aesthetic or even to a thriving economy The Ecocriticism Reader Cheryll Glotfelty,Harold Fromm,1996 This book is the first collection of its kind an anthology of classic and cutting edge writings in the rapidly emerging field of literary ecology Exploring the relationship between literature and the physical environment literary ecology is the study of the ways that writing from novels and folktales to U S government reports and corporate advertisements both reflects and influences our interactions with the natural world Contingent Lives Caroline H. Bledsoe,2010-11-15 Most women in the West use contraceptives in order to avoid having children But in rural Gambia and other parts of sub Saharan Africa many women use contraceptives for the opposite reason to have as many children as possible Using ethnographic and

demographic data from a three year study in rural Gambia *Contingent Lives* explains this seemingly counterintuitive fact by juxtaposing two very different understandings of the life course one is a linear Western model that equates aging and the ability to reproduce with the passage of time the other a Gambian model that views aging as contingent on the cumulative physical social and spiritual hardships of personal history especially obstetric trauma Viewing each of these two models from the perspective of the other Caroline Bledsoe produces fresh understandings of the classical anthropological subjects of reproduction time and aging as culturally shaped within women s conjugal lives Her insights will be welcomed by scholars of anthropology and demography as well as by those working in public health development studies gerontology and the history of medicine *Routledge Handbook of Chicana/o Studies* Francisco A. Lomelí, Denise A. Segura, Elyette Benjamin-Labarthe, 2018-08-06
