Math Examination Question Ec2:

Objective Tests and Mathematical Learning Noel Wilson, Australian Council for Educational Research, 1970

Changing Images in Mathematics Umberto Bottazini, Amy Dahan Dalmedico, 2013-06-17 This book focuses on some of the major developments in the history of contemporary 19th and 20th century mathematics as seen in the broader context of the development of science and culture. Avoiding technicalities it displays the breadth of contrasting images of mathematics favoured by different countries, schools and historical movements, showing how the conception and practice of mathematics changed over time depending on the cultural and national context. Thus it provides an original perspective for embracing the richness and variety inherent in the development of mathematics. Attention is paid to the interaction of mathematics with themes whose proper treatment have been neglected by the traditional historiography of the discipline, such as the relationship between mathematics, statistics and medicine.

For the Learning of Mathematics, 1991 **Teachers' classroom practices in addressing learners' errors in algebraic word problems** Stephen Mubanga, 2021-10-08 Master's Thesis from the year 2020 in the subject Pedagogy / School Pedagogics / University of Zambia Postgraduate studies course Master of Mathematics Education language English abstract The study explored teachers' classroom practices in addressing learners' errors regarding how they engaged grade eight learners in reading how they probed learners' understanding and what they did to enhance learners' process skills and encoding abilities in algebraic word problems. Five teachers and twenty-five learners in five focus groups (discussions of five members each) at three secondary schools in Isoka district of Muchinga province, Zambia, were purposively sampled to participate in the study. The study used a qualitative approach which followed a descriptive case study design. Data collection was done using lesson observations, semi-structured interviews, document analysis and focus group discussions. To capture observations and interviews in totality, video and audio recordings were used respectively. Thematic analysis was used to analyse data. The five performance strategies of solving word problems by Newman, namely reading ability, comprehension ability, transformation ability, process skills and encoding ability, guided the analysis of data. The study was guided by the following research questions: How do teachers engage learners in reading algebraic word problems? How do teachers probe learners' understanding of algebraic word problems? What do teachers do to enhance learners' process skills and encoding abilities in algebraic word problems?
