analytical study of John Holt's philosophy of education. It provides a clear analysis and critical evaluation of the key themes in his work, considers the main objections to his views, and discusses their relation to the contemporary homeschooling movement. The book examines Holt's critique of compulsory education and his account of the relationships between learning, freedom, intelligence, and character. It argues that Holt's works contain a philosophically rich critique of instrumentalism in education and thus continue to represent a significant challenge to many mainstream views on education today. Given its scope, the book will be of interest to anyone who wants to understand Holt's work and influence as a critic of compulsory schooling, educators, and education students, philosophers of education, and those seeking a better grasp of the ideas behind unschooling and homeschooling.

Mathematical Principles of Decision Making (Principia Mathematica Decernendi) Thomas L. Saaty. In this book, Thomas Saaty summarizes his Analytic Hierarchy Process (AHP) theory for measuring intangible factors through paired comparisons using judgments from which priorities are derived that give the relative dominance of these factors. The important concepts of the AHP and its generalization to structures with dependence and feedback, the Analytic Network Process (ANP), are presented in an elegant, compact way, and new extensions of the theory

to complex decisions involving benefits opportunities costs and risks are presented Applications to resource allocation and conflict resolution are included The generalization to continuous comparisons is covered The Encyclicon three volumes are now available is an encyclopedia of applications that is a useful accompaniment to the Principles of Mathematical Decision Making containing of examples of practical decisions *First Lines of Natural Philosophy, Divested of Mathematical Formulae* Reynell Coates, 1846
