things that have already happened might have been otherwise Central to late twentieth century European critical and sociological thinking that argument is at the centre of this volume The contributors to this volume explore subjects including how literature philosophy and history all cope with contingency the existence of contingency in genres as diverse as enlightenment fables Aristotle Hardy Jane Austen and post war American literature the contingency of old age and the poetics of contingency As the chapters here illustrate our efforts to understand each other involve a constant opening onto being otherwise an enterprise in which the role of the literary critic remains key Of interest to scholars across a range of literary genres this volume would also have applications for philosophy researchers exploring the metaphysics of contingency This book was originally published as a special issue of Textual Practice
