Genesis Pro Features

Draw

The main handle section on your Genesis Pro bow is machined 6061 Ti aluminum. This material is engineered to provide the Genesis Pro with optimal balance while being both extremely durable and very lightweight.

Larger camless aluminum grip

An oversized range of camless adjustment accommodates many modern bows and allows for customized bow fitting techniques. Since the Genesis Pro does not include a rest, choose a rest that suits your needs and shooting style.

Idler Wheel

The idler wheel is located at the upper limb of the bow. The main function of the idler wheel is to transfer draw energy from the bow limbs back through the string to the arrow in a smooth and consistent way. The

drawings in the idler wheel are made of a very low friction synthetic material which reduces friction.

Cables and Lock Rods

The cables on your Genesis Pro bow are attached to each end of the bow. They store the potential energy you put into the bow with the string is released. As the moment of release, the stored potential energy is transferred into string is motion, and the arrow is propelled toward the target.

The lock rods adjust the draw to the bow and are also used to adjust the draw length on your bow. Using a 1/4" hex wrench, the lock rods can be turned in a counterclockwise direction to decrease the draw length of the bow to a minimum of 15 lbs. Turning the lock rods clockwise will reach the bow to its maximum of 35 lbs. One full turn equals approximately 1/4 lbs. of draw weight. The lock rods on each side should always be turned the same number of turns when adjusting bow draw weight.

Genesis Pro Bowstring System

Your Genesis Pro bow features single cam design. The idler wheel can adjust the bow to maintain the set percentage through out the draw cycle. The idler wheel acts as the cam cables and guides the bow string. When the bowstring is released, the bow creates a "hard wall" which results in a better arrow while increasing bow speed.

Draw Stop

Customizing the Genesis Pro to your draw length is easy!

The draw stop on the Genesis® Pro is adjusted with an Allen wrench. Simply turn the draw stop counter-clockwise until it is completely removed. Draw it to the desired draw stop position. Tighten with security in place. Use the larger diameter draw stop to adjust to 12" (approx.) increments and the smaller diameter draw stop to adjust to 1" (approx.) increments.

Tip

The double mounting on your Genesis bow is actually designed to fit the contours of your hand, providing both comfort and consistency.

Shooting

Be ready with Genesis Pro bow with a high strength, durable bowstring made from steel of the air. The bowstring provides superior performance, ensuring that the maximum amount of the bow's stored energy is transferred to the arrow.

Power Cable and Cable Guard

The power cable is the second component of the bowstring assembly. It is anchored at the ends on the upper limb and wraps around the idler wheel on the bow which is mounted on the lower limb.

The cable guard is the metal rod which supports the sliding cable cage that keeps the cable safely off to one side and out of the light path of the arrow.

Mounting Point

Use your best guess where the arrow should be sitting back to ensure proper arrow position on the string for repeatable accuracy.

WARNING: Make certain the arrow used are in proper weight and stiffness to your bow's draw weight and draw length. Use and follow your arrow manufacturer's recommendations.
