INTRODUCTION

The hazard analysis critical control point is a core of food safety which refers to the handling, preparation and storage of food to reduce the risk of individuals becoming sick from food borne diseases.

The hazard analysis critical control point plan is a document that outlines the hazards associated with a product, incoming materials, ingredients, process steps and how they are controlled.

The plan determines the critical control points in a specific operation of food handling.

It is a preventive systematic approach for the production of safe food products which helps to identify and manage food safety related risk from physical, chemical and biological hazards in production processes which can cause the finished product to be unsafe, applying control measures to reduce these risks to a safe level or eliminate the likelihood of occurrence is effective by putting in place a strict monitoring and control of
