

EVIDENCE-BASED PRACTICE

Evidence-based practice is, as the name suggests, the idea that occupational practices should be based on scientific evidence.

OVERVIEW

Evidence-based practice requires a systematic approach to the translation of research findings into practice.

Supporters of evidence-based practice claim that it can to bridge the gap between research and practical application. Evidence-based practices distinguish between research that has immediate practical significance and research that doesn't.

EXAMPLES

- **Hand Hygiene in Hospitals:** This was implemented in the 19th Century after evidence it reduced mortality rates.
- **Play-Based Learning:** learning theorists in the early- to mid-20th Century presented evidence that play-based learning supports children's cognitive development, which has affected curriculum development worldwide.

Evidence-based Practice in Nursing & Healthcare Bernadette Mazurek Melnyk, Ellen Fineout-Overholt, 2011 Bernadette Mazurek Melnyk and Ellen Fineout Overholt are creators of the ARCC Advancing Research and Clinical practice through close Collaboration Model an innovative strategy for implementing and sustaining evidence based practice in healthcare systems The ARCC Model is cited as an exemplar of education in evidence based practice in the Board on Health Care Services and the Institute of Medicine's book *Health Professions Education A Bridge to Quality* Melnyk and Fineout

Overholt's book should be required reading in all graduate programs. Their text has provided a blueprint for the future of nursing practice and a rigorously substantiated and clearly described means for clinicians, educators, and administrators to participate in improving quality of care. Janet D. Allan PhD RN FAAN, Dean and Professor, University of Maryland School of Nursing, Evidence-based Practice in Nursing Healthcare: A Guide to Best Practice has been instrumental in developing a culture of evidence-based practice at Barnes Jewish Hospital. It is fundamental to our curriculum provided to all levels of staff from new graduate nurses to the highest levels of hospital leadership. Dr. Patricia Potter RN PhD FAAN, Dr. Gail Rea RN PhD CNE, Dr. Karen Balakas RN PhD CNE, Jennifer Williams MSN RN ACNS BC, Elizabeth Pratt MSN RN ACNS BC, Evidence Equals Excellence group at Barnes Jewish Hospital and Barnes Jewish School of Nursing at Goldfarb, Evidence-based Practice in Nursing Healthcare: A Guide to Best Practice is an exemplary text that spans the continuum of nursing evidence to support best practice. Utilizing this text with undergraduate RN to BSN and graduate nursing students, it is the ONLY text that demonstrates how to retrieve, read, and analyze evidence, whether it is published as an individual study, systematic review, meta-analysis, best practice guideline, or outcomes management report. Students learn how to utilize multiple complex databases and websites as they move through each chapter. And they experience dissemination of evidence through the development of presentations, publications, posters, and grants. This is truly a remarkable book that embraces evidence as the basis for nursing practice and patient-centered care and safety. Having used this text with more than 1000 students over the past five years, I can honestly say that I have found no other text that facilitates learning and development of clinical judgment that is grounded in valid, reliable, and applicable evidence. This is a keeper. Alice E. Dupler JD APRN BC, Clinical Associate Professor, Washington State University College of Nursing. I have used the book since I developed the Evidence-based Practice course for our College of Nursing in Fall 2007. It was the first course of its kind at Indiana State University. It has been well received and the preferred course for all nursing graduate students for completion of their final scholarly projects. The text was essential in developing the course and provides the foundation and guidance that the students need to develop their Evidence-Based Practice projects. The students love the text. Susan Eley PhD RN FNP BC, Assistant Professor, Director, FNP Program, Indiana State University.

Evidence-based Nursing Guide to Legal & Professional Issues, 2009. Evidence should be the basis of all nursing practice and action. This book was written to provide nurses with guidelines for evidence-based nursing care.
