an essential research tool *Muses and Measures* Frank Hakemulder, Willie van Peer, Sonia Zyngier, 2014-06-26 This is a textbook that has been needed for decades It should be required reading for every student and professor in literary studies and for that matter in any humanistic discipline Humanistic methods of inquiry certainly have their place but all too often humanistic scholars present entire theories and have no idea how to test them or even realize that they should be tested in a scientific manner Such scholars can only try to convince readers that they are right It is absurd to use rhetoric when there are perfectly good empirical methods of testing such theories If they are not so tested they are quite likely to lead us astray In a very engaging way the authors almost seduce readers into wanting to learn about empirical methods and statistics The book is full of suggested projects for students Students are led through how to search sources such as PsycInfo in order to get ideas and then gradually introduced to basic statistics and shown in detail how to analyze data that they themselves may have gathered By focusing on practical matters and not bothering much with formulas that will soon be forgotten readers are given a good intuitive grasp of not just simple statistics but also statistics at an intermediate level **The Compilation of**
