Materials Development For Language Learning And Teaching:

Materials Development in Language Teaching Brian Tomlinson, 2011-04-07 Materials Development in Language Teaching aims to help readers apply current theoretical principles and research findings to the practical realities of developing and exploiting classroom materials. The authors also suggest new ideas and directions in materials development which readers can pursue for themselves. This book is accessible to readers with little previous experience in the field and is essential reading for all those involved in developing materials for language teaching. In the second edition of this highly popular title each chapter has been comprehensively revised and updated to take into account both recent research and the significant technological developments since the first edition was published in 1998. Two new chapters have been added to assess the potential of electronic media for materials development. These chapters include an overview of the technologies available as well as individual case studies and activities. Materials Development in Language Teaching Brian Tomlinson, 1998-03-05

This book engages with current issues in developing materials for language teaching. **SLA Research and Materials Development for Language Learning** Brian Tomlinson, 2016-05-20 **SLA Research and Materials Development for Language Learning** is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections: position statements, materials driven by SLA theory, evaluations of materials in relation to SLA theory, and proposals for action that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for post graduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.

Research for Materials Development in Language Learning Brian Tomlinson, Hitomi Masuhara, 2010-11-18 This title examines current research in materials development and discusses their implications for the learning and teaching of languages. Recently there has been a dramatic increase in the attention given to materials development as an academic discipline. More universities are including modules on materials development on their MA in applied linguistics courses and more students are studying materials development in their PhD research. Yet to date there has been no publication focusing on reporting and discussing the results of research in materials development. This fills that gap, reporting on the results of recent research projects in materials development and discussing their implications for the learning and teaching of languages. The editors' introduction outlines the rationale, scope and objectives of the book and reviews previously published reports of research in materials development. There are concluding chapters which point out implications for second language acquisition theory and research methodology. The book features suggestions for applications of the reported research for materials development and proposals for future action in research in materials development for language teaching. The

Language Teaching Materials Nigel Harwood,2010-03-22 This volume presents a union of theoretical and practical pedagogical perspectives on materials design and development *Authenticity in Materials Development for Language*

Learning Alan Maley, Brian Tomlinson, 2017-11-06 This volume makes a unique contribution to the literature on materials development for language learning. It focuses on issues related to authenticity in materials development and includes research based position statements, applications of theory to practice and developments of theory from observed practice. Each paper concentrates on a different aspect of authenticity and many of them introduce the reader to previously unexplored facets of authenticity. The chapters are sequenced so that the book moves from general discussion about the value of authenticity to reports of evaluations of authenticity to reports of the exploitation of authenticity in specific learning contexts. Many questions are raised, much revealing data is reported and analysed and many pedagogic suggestions are made. The contributions here have been written so that they are of potential value to teachers, to materials developers, to post graduate students and to researchers. They are written to be academically rigorous but at the same time to be accessible to newcomers to the field and to experienced experts alike.

Perspectives on Language Learning Materials

Development Freda Mishan, Angela Chambers, 2010 Language learning materials development remains a surprisingly under supported aspect of language teaching. This book constitutes a much needed resource in the area aiming to support and advance the craft of materials design. The volume offers a snapshot of the contemporary influences on language learning materials development from diverse perspectives around the globe. These influences include the demands of teaching ESOL in Britain and Ireland, the impact of Corpus Linguistics, the needs of young learners and of diverse worldwide audiences, the development of intercultural competence as well as the integration of L2 acquisition research. Contributors to the volume are drawn from a broad range of teaching research and materials development backgrounds. The book includes some chapters based on papers given at the MATSDA Materials Development Association 2008 conference.

Issues in Materials

Development Maryam Azarnoosh, Mitra Zeraatpishe, Akram Faravani, Hamid Reza Kargozari, 2016-03-22 Issues in Materials Development provides readers with theoretical foundations and practical aspects of designing materials for EFL/ESL contexts. It starts with discussing some basic and preliminary principles of materials design followed by scrutinizing critical issues in materials development in an objective and systematic way. This ranges from considering learners' needs, adopting/adapting selection and gradation of materials to the specific focus of the book on developing various types of materials for the four language skills: pronunciation, ESP vocabulary and computer assisted language learning materials. Authenticity of materials to be designed and the inclusion of affective factors to develop motivating materials to engage language learners, in addition to features of materials design at a universal level, are other areas to read about. This book finally tries to open new horizons and possible futuristic approaches to improve today's ELT materials.

Teacher Training for English-Medium Instruction in Higher Education

Sánchez-Pérez, María del Mar, 2020-02-07 English medium instruction (EMI) has become a pervasive teaching model in recent higher education. The implementation of EMI programs requires changes in university teaching methods since most lecturers need to adapt their contents and the way they teach them to successfully work in foreign

language environments The rapid proliferation of such programs has resulted in concern among teaching staff who have felt pushed towards teaching their subject content through a non native language with little or no previous training As a result many recent studies have highlighted the importance and urgency to train teaching staff in terms of language proficiency and the appropriate teaching methods techniques and strategies to be applied in EMI lessons Teacher Training for English Medium Instruction in Higher Education is an academic research publication that provides comprehensive research on effective approaches and experiences in teacher training for EMI at universities both in terms of language skills and teaching methodologies and that analyzes the design and development of comprehensive teacher training programs that successfully engage these EMI programs It has profound implications for the development of the international profile of higher education institutions as it provides information on how to train highly qualified lecturers to successfully teach students from different nationalities Featuring a wide range of topics such as assessment curriculum design and learning styles this book is ideal for pre and in service teachers language specialists content specialists administrators deans higher education faculty researchers practitioners curriculum designers policymakers academicians and students
