Beeline Shalini Shankar, 2019-04-30 An anthropologist uses spelling bees as a lens to examine the unique and diverse traits of Generation Z and why they are destined for success At first glance Generation Z youth born after 1997 seems to be made up of anxious overachievers hounded by Tiger Moms and constantly tracked on social media One would think that competitors in the National Spelling Bee the most popular brain sport in America would be the worst off Counterintuitively anthropologist Shalini Shankar argues that far from being simply overstressed and overscheduled Gen Z spelling bee competitors are learning crucial twenty first century skills from their high powered lives displaying a sophisticated understanding of self promotion self direction and social mobility Drawing on original ethnographic research including interviews with participants judges and parents Shankar examines the outsize impact of immigrant parents and explains why Gen Z kids are on a path to success

The Broken Places Susan Perabo, 2001-11-03 Susan Perabo's short story collection *Who I Was Supposed to Be* was named a Best Book of 1999 by the Los Angeles Times The Miami Herald and the St Louis Post Dispatch The Boston Globe proclaimed the debut a stunning introduction to a fresh new literary talent Now Susan Perabo returns with *The Broken Places* her eagerly anticipated novel about love and honor and how the aftermath of one terrifying night and one heroic act affects a close knit family Twelve year old Paul Tucker knows his family is something akin to royalty in small town Casey Pennsylvania His father Sonny is a dedicated career fireman in line for the position of chief long held by Paul's late grandfather a local legend whose heroics continue to occupy the hearts and minds of all who knew and worked with him Paul's mother Laura is a math teacher at the high school Paul is sometimes annoyed by her worries over him and her apparent lack of worry over his father but his life is generally untroubled his future bright his time measured by sport seasons But on a windy October day the collapse of an abandoned farmhouse forever alters the fates and perceptions of Paul his family and those closest to them Sonny and the other Casey firemen attempt a dangerous rescue to reach a teenager buried under the rubble and when Sonny himself is trapped by a secondary collapse Paul his mother and the crowd of onlookers believe the worst The wait is excruciating it's baby Jessica all over again but this time the innocent victim is sixteen year old Ian Finch a swastika tattooed hoodlum who may have brought the house down on himself while building bombs Still when Sonny emerges from the rubble hours later the maimed teenager in his arms the rescue becomes a minor miracle and a major public relations event a validation of all things American and true Sonny is immediately hailed as a national hero And Paul's life is suddenly and irrevocably changed Beyond the limelight the parades and the intrusion of the national media into a quiet and predictable life the Tucker household balance is upset And Ian Finch's curious and continued involvement in Sonny's life creates a new and troubling set of hurdles for Paul to overcome Somehow though his father has been saved he continues to slip through Paul's fingers Secrets lies and changing alliances threaten Paul's relationship with his father and his mother and his understanding of what holds a family and a town together *The Broken Places* is a brilliant

meditation on the psychology of heroism the definition of family and the true meaning of honor With pitch perfect dialogue subtle but stunning insights and a dazzling ability to uncork the quiet power of each character Susan Perabo's *The Broken Places* uncovers and celebrates the unsettling truths of human nature

Behaviourism in Studying Swarms: Logical Models of Sensing and Motoring Andrew Schumann, 2018-05-25 This book presents fundamental theoretical results for designing object oriented programming languages for controlling swarms It studies the logics of swarm behaviours According to behaviourism all behaviours can be controlled or even managed by stimuli in the environment attractants motivational reinforcement and repellents motivational punishment At the same time there are two main stages in reactions to stimuli sensing perceiving signals and motoring appropriate direct reactions to signals This book examines the strict limits of behaviourism from the point of view of symbolic logic and algebraic mathematics how far can animal behaviours be controlled by the topology of stimuli On the one hand we can try to design reversible logic gates in which the number of inputs is the same as the number of outputs In this case the behaviouristic stimuli are inputs in swarm computing and appropriate reactions at the motoring stage are its outputs On the other hand the problem is that even at the sensing stage each unicellular organism can be regarded as a logic gate in which the number of outputs means of perceiving signals greatly exceeds the number of inputs signals

Gordon, Beatrice L. Bridglall, Aundra Saa Meroe, 2005 In Supplementary Education the editors argue that while access to schools that enable and expect academic achievement is a necessary ingredient for the education of students schools alone may not be sufficient to ensure universally high levels of academic development Supplemental educational experiences may also be needed The idea of supplementary education is based on the assumption that high academic achievement is closely associated with exposure to family and community based activities and learning experiences that occur both in and out of school in support of academic learning For low income and some ethnic minority student groups opportunities to participate in such activities are generally under resourced and underutilized in comparison to the access to

and participation in such activities by many European and Asian Americans from mid to high socio economic backgrounds This book makes the case for supplementary education Specifically it focuses on the need for universal access to high levels of academic achievement and the challenge of reducing the achievement gap that exists between Asian American and European American students and their African American Latina o and Native American counterparts Having posed the problem the editors define the construct and provide in depth descriptions of some of the more colloquial expressions of supplementation in after school care youth development and other forms of supplemental education The editors close with a discussion of the emerging institutionalization and need for more thoughtful and rigorous research of the supplementary education movement
