Government-Linked Companies and Sustainable, Equitable Development Terence Gomez, François

Bafoil, Kee-Cheok Cheong, 2014-11-27 The debate over how far governments should intervene in economies in order to promote economic growth a debate which from the 1980s seemed settled in favour of the neo liberal non interventionist consensus has taken on new vigour since the financial crisis of 2008 and after Some countries most of them in industrialised Asia have survived the crisis and secured equitable economic growth by adopting a developmental state model whereby governments have intervened in their economies often through explicit support for individual companies This book explores debates about government intervention assesses interventionist policies including industrial and innovation policies and examines in particular the key institutions which play a crucial role in implementing government policies and in building the bridge between the state and the private sector The countries covered include China India South Korea Malaysia and Taiwan together with representative countries from Europe and Latin America

The Political Economy of Automotive Industrialization in East Asia Richard F. Doner, Gregory W. Noble, John Ravenhill, 2021 East Asia is a powerhouse of automobile production Yet across the region national automobile industries have had strikingly different patterns of development Despite starting from equally low levels of performance and initially similar strategies countries have experienced vastly different results From Thailand's success as an assembly hub for foreign automakers and China's unexpected achievements in building its own car industry to South Korea's impressive development of an integrated industry to the Philippines persistent weakness these divergent paths offer a fascinating window into the determinants of economic growth The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world's most important regions Utilizing interviews and original language research from multiple nations this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development Richard F Doner Gregory W Noble and John Ravenhill instead highlight the significance of two sets of factors countries very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions Through cross national analyses of China Taiwan South Korea Indonesia Malaysia the Philippines and Thailand the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms Brief comparisons with Brazil Mexico and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science which fail to give sufficient emphasis to the role of public and public private institutions or provide an explanation of the political bases of those institutions In a world where auto assemblers and suppliers are facing new challenges in an ever evolving industry such as the transition to electric and autonomous vehicles this book offers a crucial perspective on the centrality of institutional capacities and political

economy By tracing the divergent trajectories of seven nations The Political Economy of Automotive Industrialization in East Asia offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth

Changing Constellations of Southeast Asia Jan Nederveen Pieterse, Abdul Embong, Siew Yean Tham, 2017-10-17 Southeast Asia is among emerging economies that have become important drivers of the world economy ASEAN has furthered the region's economic integration Yet growth remains dependent on foreign investment Inequality has grown or remained high Democracy instead of consolidating has stalled or regressed Changing Constellations of Southeast Asia seeks to Shed light on the gap between Northeast Asia and Southeast Asia from a variety of viewpoints across trade and industry services and education and language policies Examine institutions and elite capture to understand why middle tier Southeast Asian countries have failed in following the East Asian miracle Examine China's growing influence and how this growing role affects Southeast Asia as a constellation Contributing to critical political economy and comparative development studies in East Asia this timely volume will appeal to undergraduate and postgraduate students interested in Southeast Asia studies International Political Economy Development sociology and economics Social Policy and Asian Politics

Emerging Capitalism in Central Europe and Southeast Asia F. Bafoil, 2015-12-24 This book examines the emergence of different forms of capitalism in Central Eastern states in Europe and Mekong states within the Association of Southeast Asian Nations ASEAN All of them but Thailand have historically disappeared from the regional maps for long periods of time due to colonial or imperial rule Most of them were previously members of a soviet type economy and they all joined ASEAN or the European Union in the 1990s or in the 2000s These states are characterized by a strong urge toward feelings of national sovereignty due to their experiences with colonialism and imperialism But due to the regional economic pressures and the globalization dynamic these states cannot articulate protectionist policies They are forced to open their economies in order to attract Foreign Direct Investments This results in less regulated and more political forms of capitalism than in some more developed capitalist countries This book analyzes forms of capitalism as the arising from a combination of three conditions the legacy of the foreign occupations the national construction process of the sovereign state and lastly the dynamics of regional integration These states claims to national sovereignty and the manner in which they developed suggests a causative link between the forms of political domination that have presided over these transformations and the forms of capitalism that have resulted

Misgovernance Edmund Terence Gomez, 2024 In Malaysia's corporate sector comprising a vast number of government linked companies GLCs a political business system has emerged contributing to grand corruption This book offers evidence of a Political GLC complex featuring multi faceted covert government business relations Power is overwhelmingly concentrated in the executive arm of government whose misgovernance of this complex has had major economic and political ramifications A compilation of political business controversies between 1980 and 2023 along with three case studies provides insights into a deeply corrupt GLC ecosystem that can function legitimately
