Navigating Conflict Calvin Morrill, Michael Musheno, 2018-04-24 Urban schools are often associated with violence chaos and youth aggression But is this reputation really the whole picture In Navigating Conflict Calvin Morrill and Michael Musheno challenge the violence centered conventional wisdom of urban youth studies revealing instead the social ingenuity with which teens informally and peacefully navigate strife ridden peer trouble Taking as their focus a multi ethnic high poverty school in the American southwest the authors complicate our vision of urban youth along the way revealing the resilience of students in the face of carceral disciplinary tactics Grounded in sixteen years of ethnographic fieldwork Navigating Conflict draws on archival and institutional evidence to locate urban schools in more than a century of local state and national change Morrill and Musheno make the case for schools that work where negative externalities are buffered and policies are adapted to ever evolving student populations They argue that these kinds of schools require meaningful inclusive student organizations for sustaining social trust and collective peer dignity alongside responsive administrative leadership Further students must be given the freedom to associate and move among their peers all while in the vicinity of watchful but not intrusive adults Morrill and Musheno make a compelling case for these foundational conditions arguing that only through them can schools enable a rich climate for learning achievement and social advancement **SEBI Grade A Legal Officer**

Archibald, David H. Feldman, 2017-07-03 The US higher education system is on the verge of a revolution so some observers claim Archibald and Feldman leading analysts provide an incisive overview of the challenges facing and possibilities for America's universities and colleges in their training future generations And they demonstrate that our higher education system is resilient and adaptable enough to weather the internal external and technological threats without changing campuses beyond recognition The Road Ahead for America's Colleges and Universities examines the threats posed to the current health of higher education by rising tuition and falling government support as well as from new digital technologies rippling through the entire economy Some predict disaster pointing to high costs exploding debt and a digital tsunami that supposedly will combine to disrupt and sweep away many of the nation's higher education institutions or change them beyond recognition Archibald and Feldman provide a more nuanced view They argue that the bundle of services that four year colleges and universities provide will retain its value for the traditional age range of college students Less certain Archibald and Feldman argue is whether the system will continue to be a force for social and economic opportunity The threats are most dire at schools that disproportionately serve America's most underprivileged students At the same time growing income inequality reduces the ability of many students and their families to pay for higher education Archibald and Feldman suggest a range of policy options at the state and federal level that will help America's higher education system continue to fulfill its promise
