in World War II These radars were used by military personnel from Australia the United States and New Zealand From a sociological perspective her career offers many examples of the perils of being a female academic in the first half of the 20th century Written in an engaging style and complemented by many historical photographs this book offers fascinating insights into the beginnings of radio astronomy and the role of a pioneering woman in astronomy To set the scene the first colourfully illustrated chapter presents an overview of solar astrophysics and the tools of the radio astronomer From the reviews of Under the Radar This is a beautifully researched copiously illustrated and well written book that tells us much more than the life of one amazing female radio astronomer It also provides a profile on radar developments during WWII and on Australia s pre eminent place in solar radio astronomy in the years following WWII Under the Radar is compelling reading and if you have taken the time to read right through this review then it certainly belongs on your bookshelf Wayne Orchiston Journal of Astronomical History and Heritage March 2010 Government Reports Announcements & Index ,1987-03 **Psychology in Everyday Life** David G.
