X-kit Fet G10 Mathematics , **Research in Education** , 1974 *Resources in Education* , 1991-04 *Meeting the Challenges to Measurement in an Era of Accountability* Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject

areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8. Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. Perspective and Strategies on Newage Education and Creative Learning Shibani Khanra Jha, Meetha V Shenoy, Tamali Bhattacharyya, Padmanabhan Seshaiyer, 2024-10-08

This book presents the proceedings of the International Conference on Best Innovative Teaching Strategies (ICOBITS) at BITS Pilani on Feb 9-11, 2023. It brings together global academicians, researchers, and industry experts to delve into innovative teaching-learning practices. Meticulously selected and reviewed by professionals, the proceedings offer cross-cutting perspectives and strategies in education and creative learning. It is organized into four parts and covers Innovative Pedagogical Practices for Technology-Enhanced Learning, Technology Society and Industry in Higher Education, STEM Education and Cultural Studies, Gender Studies and Sustainability in Higher Education. It provides insights into assessment tools for effectively evaluating the efficiency of teaching methods. Part one explores ICT, digital classrooms, metaverse-based teaching, gamification, and AI/ML-based practices. Part two delves into the humanistic approach in technical education, social networking as an educational tool, and outcome-based assessment needs. Part three addresses future educators' requirements through multidisciplinary collaboration in STEM education. Part four discusses gender equity, structured social inclusion, and cultural skills in teaching-learning practices. This book is a valuable resource for academicians, researchers, policymakers, administrators, technocrats, and developers actively engaged in education technology across disciplines such as Engineering, Sciences, Management, Humanities, and Social Sciences.
