The Paradox of Grammatical Change Ulrich Detges,Richard Waltereit,2008-02-06 Recent years have seen intense debates between formal generative and functional linguists particularly with respect to the relation between grammar and usage This debate is directly relevant to diachronic linguistics where one and the same phenomenon of language change can be explained from various theoretical perspectives In this a close look at the divergent and or convergent evolution of a richly documented language family such as Romance promises to be useful The basic problem for any approach to language change is what Eugenio Coseriu has termed the paradox of change if synchronically languages can be viewed as perfectly running systems then there is no reason why they should change in the first place And yet as everyone knows languages are changing constantly In nine case studies a number of renowned scholars of Romance linguistics address the explanation of grammatical change either within a broadly generative or a functional framework

An Areal Typology of Agreement Systems Ranko Matasović,2018-05-24 The first areal typological exploration of agreement systems in the world s languages Future Times, Future Tenses Philippe de Brabanter,Mikhail Kissine,Saghie Sharifzadeh,2014 This book

examines the expression of the future in a range of diverse languages and from a variety of theoretical perspectives It reveals the value of linking linguistic considerations of tense and aspect to philosophical approaches to modality and time and will be a valuable resource for all those working on time tense and temporal reference **ESTRUCTURAS SINTÁCTICAS**

COMPARADAS FRÍAS CONDE, Francisco Xavier ,2024-08-22 El presente volumen compara estructuras sint cticas de varias familias ling sticas rom nico eslavo germ nico junto con rabe quichua h ngaro y euskera aunque hay ejemplos aislados de griego persa y otros proveyendo una base de datos que comparados permiten entender las diversas estructuras sint cticas lo cual permite al lector sacar sus propias conclusiones a partir de los datos ofrecidos Hay una presentaci n sintagm tica por un lado y funtem tica por otro dentro del marco de la Gram tica Funcional Categorical que es un punto de encuentro entre la Gram tica Generativa y las corrientes funcionalistas *Referring to discourse participants in Ibero-Romance languages* Pekka Posio,Peter Herbeck,2023-09-29 This volume brings together contributions by researchers focusing on personal pronouns in Ibero Romance languages going beyond the well established variable of expressed vs non expressed subjects While factors such as agreement morphology topic shift and contrast or emphasis have been argued to account for variable subject expression several corpus studies on Ibero Romance languages have shown that the expression of subject pronouns goes beyond these traditionally established factors and is also subject to considerable dialectal variation One of the factors affecting choice and expression of personal pronouns or other referential devices is whether the construction is used personally or impersonally The use and emergence of new impersonal constructions eventually also new im personal pronouns as well as the variation found in the expression of human impersonality in different Ibero Romance language varieties is another interesting research area that has gained ground in the recent years In addition to variable subject expression similar methods and theoretical approaches have been applied to study the expression of objects Finally the reference to the addressee s using different address pronouns and other address forms is an important field of study that is closely connected to the variable expression of pronouns The present book sheds light on all these aspects of reference to discourse participants The volume contains contributions with a strong empirical background and various methods and both written and spoken corpus data from Ibero Romance languages The focus on discourse participants highlights the special properties of first and second person referents and the factors affecting them that are often different from the anaphoric third person The chapters are organized into three thematic sections i Variable expression of subjects and objects ii Between personal and impersonal and iii Reference to the addressee **Complex Adpositions in European Languages** Benjamin Fagard,José Pinto de Lima,Dejan Stosic,Elena Smirnova,2020-10-26 While much attention has been devoted to simple nominal relators especially prepositions and case markers complex nominal relators have not yet been the focus of a systematic and cross linguistic study The chapters of this volume provide not only a working definition of such constructions but also a description of complex adpositions and other complex nominal relators in a variety of European languages both Indo European and non Indo European including some languages for which this phenomenon had received little attention such as Breton and Albanian Building on synchronic and diachronic corpus based investigations the authors show commonalities and specificities of these linguistic items across languages trying to explain why and how they emerged The

research presented in this volume confirms the wide spread use of complex adpositions in Europe and the data reviewed in the final discussion suggests it might be the same in other parts of the world as well This book thus offers not only detailed descriptions of complex nominal relators in fifteen languages but also indications of what to look for in other languages and how to distinguish between a syntactically free sequence and a genuine complex nominal relator

The Acquisition of Differential Object Marking Alexandru Mardale, Silvina Montrul, 2020-06-15 Differential Object marking DOM a linguistic phenomenon in which a direct object is morphologically marked for semantic and pragmatic reasons has attracted the attention of several subfields of linguistics in the past few years DOM has evolved diachronically in many languages whereas it has disappeared from others it is easily acquired by monolingual children but presents high instability and variability in bilingual acquisition and language contact situations This edited collection contributes to further our understanding of the nature and development of DOM in the languages of the world in acquisition and in language contact variation and change The thirteen chapters in this volume present new empirical data from Estonian Spanish Turkish Korean Hindi Romanian and Basque in different acquisition contexts and learner populations They also bring together multiple theoretical and methodological perspectives to account for the complexity and dynamicity of this widespread linguistic phenomenon
