Variation and Change in French Morphosyntax Anna Tristram, 2017-07-05 Collective nouns such as *asmajorite* or *foule* have long been of interest to linguists for their unusual semantic properties and provide a valuable source of new data on the evolution of French grammar This book tests the hypothesis that plural agreement with collective nouns is becoming more frequent in French Through an analysis of data from a variety of sources including sociolinguistic interviews gap fill tests and corpora the complex linguistic and external factors which affect this type of agreement are examined shedding new light on their interaction in this context Broader questions concerning the methodological challenges of studying variation and change in morphosyntax and the application of sociolinguistic generalisations to the French of France are also addressed

New Frontiers in Textual Data Analysis Giuseppe Giordano, Michelangelo Misuraca, 2024-09-23 This volume presents a selection of articles which explore methodological and applicative aspects of textual data analysis Divided into four parts it begins by focusing on statistical methods and then moves on to problems in quantitative language processing After discussing the challenging task of text mining in relation to emotional and sentiment analyses the book concludes with a collection of studies in the social sciences and public health which apply textual data analysis methods The refereed contributions were originally presented at the 16th International Conference on Statistical Analysis of Textual Data JADT 2022 which took place in Naples Italy on July 6 8 2022 The biennial JADT meeting discusses theories problems and practical uses of textual data analysis in various fields sharing a quantitative approach to the study of lexical textual pragmatic or discursive features of information expressed in natural language

Perspectives on Language Structure and Language Change Lars Heltoft, Iván Igartua, Brian D. Joseph, Kirsten Jeppesen Kragh, Lene Schøsler, 2019-06-15 This volume centers on three important theoretical concepts for the study of language change and the ways in which language

structure emerges and turns into new structure reanalysis actualization and indexicality Reanalysis is a part of ongoing everyday language use a process through which language is reproduced and changed Actualization refers to the processes through which a reanalyzed structure spreads throughout single communities and society Indexicality covers the way in which parts of a linguistic system can point to other parts of the system both syntagmatically and paradigmatically The inclusion of indexicality leads to fine grained analysis in morphology word order and constructional syntax

Manual of Deixis in Romance Languages Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years It is crucial for a number of different subdisciplines pragmatics semantics cognitive and contrastive linguistics to name just a few The subject is of particular interest to experts and students philosophers teachers philologists and psychologists interested in the study of their language or in comparing linguistic structures The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space time person nor our use of them are identical cross culturally This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties This volume will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective Chapters on diachronic developments language change comparisons with other non European languages and on interfaces with neighboring fields of interest are also included The editors and authors hope that readers regardless of their familiarity with Romance languages will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world

Manual of Romance

Word Classes Anna-Maria De Cesare, Giampaolo Salvi, 2024-09-02 Word classes are linguistic categories serving as basis in the description of the vocabulary and grammar of natural languages While important publications are regularly devoted to their definition identification and classification in the field of Romance linguistics we lack a comprehensive state of the art overview of the current research This Manual offers an updated and detailed discussion of all relevant aspects related to word classes in the Romance languages In the first part word classes are discussed from both a theoretical and historical point of view The second part of the volume takes as its point of departure single word classes described transversally in all the main Romance languages while the third observes the relevant word classes from the point of view of specific Romance based varieties The fourth part explores Romance word classes at the interface of grammar and other fields of research The Manual is intended as a reference work for all scholars and students interested in the description of both the standard major Romance languages and the smaller lesser described Romance based varieties **Tense, aspect and discourse structure**

Jakob Egetenmeyer, Sarah Dessi Schmid, Martin G. Becker, 2024-09-23 Tense and aspect are crucial devices of sentence meaning They interact with Aktionsart but also with verb types and adverbs when indicating temporal relations and building temporal discourse structure On the discourse level they are co determined by narrative functions enhancing the complexity of their description The volume depicts this vast field It unites twelve contributions which elaborate on three thematic cores 1 the context sensitivity of tense and aspect and their relationships with neighbouring categories 2 their interaction with adverbs 3 their functioning in discourse The volume advances our knowledge of the matters at hand in different respects It discusses the onomasiological status of categories such temporality and aspectuality critically It addresses the functioning of tense in discourse from various angles A further focus is placed on the imperfective past tense aspect form its uses and meaning potentials Its analysis ranges from marking evidentiality to indicating perspectives The volume combines papers with various theoretical approaches and methodologies notably formally oriented linguistics and data driven accounts The multiplicity of subjects and methods may resonate beyond the field of Romance linguistics *Adverbials in Use* Laure Sarda, Shirley Carter-Thomas, Benjamin Fagard, Michel Charolles, 2014-10-14 Contributions in this volume will lead to a better understanding of the complex interplay of competing motivations affecting the use of adverbials in Manual of Standardization in the Romance Languages Franz Lebsanft, Felix Tacke, 2020-01-20 Language standardization is an ongoing process based on the notions of linguistic correctness and models This manual contains thirty six chapters that deal with the theories of linguistic norms and give a comprehensive up to date description and analysis of the standardization processes in the Romance languages The first section presents the essential approaches to the concept of linguistic norm ranging from antiquity to the present and includes individual chapters on the notion of linguistic norms and correctness in classical grammar and rhetoric in the Prague School in the linguistic theory of Eugenio Coseriu in sociolinguistics as well as in pragmatics cognitive and discourse linguistics The second section focuses on the application of these notions with respect to

the Romance languages It examines in detail the normative grammar and the normative dictionary as the reference tools for language codification and modernization of those languages that have a long and well established written tradition i e Romanian Italian French Catalan Spanish and Portuguese Furthermore the volume offers a discussion of the key issues regarding the standardization of the minor Romance languages as well as Creoles Communication Et Éducation Interculturelles Fred Dervin,Eija Suomela-Salmi,2006 In the context of cultural and economic globalization intercultural communication is of central importance for the study of social and educational processes and practices This volume contains contributions on conceptual issues as well as case studies on intercultural communication and education in Finland Some of the contributions were first presented at the conference Enhancing the Visibility and Collaboration of Researchers in Intercultural Communication and Education in Finland which took place at the University of Turku Finland in October 2004 The other collected articles offer various contrasting perspectives on issues related to interculturality Dans le contexte de la mondialisation culturelle et conomique la recherche en communication interculturelle est d une importance capitale pour l tude des pratiques et des processus sociaux et ducatifs Les contributions de ce volume rel vent tant du traitement de probl mes conceptuels que de l tude de cas r unies autour du th me de la communication et de l ducation interculturelles en Finlande Certaines d entre elles ont t pr sent es lors de la conf rence intitul e Visibilit et collaboration des chercheurs en communication et en ducation interculturelles en Finlande qui s est d roul e en octobre 2004 l Universit de Turku D autres viennent s ajouter l ouvrage offrant ainsi des clairages la fois compl mentaires et diff rents sur les probl matiques de l interculturalit Reported Discourse Tom Güldemann,Manfred von Roncador,2002-01-01 The present volume unites 15 papers on reported discourse from a wide genetic and geographical variety of languages Besides the treatment of traditional problems of reported discourse like the classification of its intermediate categories the book reflects in particular how its grammatical semantic and pragmatic properties have repercussions in other linguistic domains like tense aspect modality evidentiality reference tracking and pronominal categories and the grammaticalization history of quotative constructions Almost all papers present a major shift away from analyzing reported discourse with the help of abstract transformational principles toward embedding it in functional and pragmatic aspects of language Another central methodological approach pervading this collection consists in the discourse oriented examination of reported discourse based on large corpora of spoken or written texts which is increasingly replacing analyses of constructed de contextualized utterances prevalent in many earlier treatments The book closes with a comprehensive bibliography on reported discourse of about 1 000 entries Imperative Turns at Talk Marja-Leena Sorjonen,Liisa Raevaara,Elizabeth Couper-Kuhlen,2017-08-15 In middle class Anglo speaking circles imperatives are considered impolite forms that command another to do something etiquette manuals recommend avoiding them The papers in this collection de construct such lay beliefs Through the empirical examination of everyday and institutional interaction across a range of languages they show that imperatives are routinely used for

constructing turns that further sociality in interactional situations Moreover they show that for understanding the use of an imperatively formatted turn its specific design whether it contains e g an overt subject object modal particles or diminutives and its sequential and temporal positioning in verbal and embodied activities are crucial The fact that the same type of imperative turn is appropriate under the same circumstances across linguistically diverse cultures suggests that there are common aspects of imperative turn design and common pragmatic dimensions of situations warranting their use The volume provides new insights into the resources and processes involved when social actors try to get another to do something

Variation and Change in Gallo-Romance Grammar Sam Wolfe, Martin Maiden, 2020 This volume offers a wide range of case studies on variation and change in the Gallo Romance sub family It draws on a wealth of data from standard and non standard varieties and adopts a variety of theoretical and conceptual approaches including traditional philology sociolinguistics formal syntax and discourse pragmatics *The Politics of Person Reference* Naomi Truan, 2021-10-15 This book the first systematic exploration of the third person in English German and French takes a fresh look at person reference within the realm of political discourse By focusing on the newly refined speech role of the target attention is given to the continuity between second and third grammatical persons as a system The role played by third person forms in creating and maintaining interpersonal relationships in discourse has been surprisingly overlooked Until now third person forms have overwhelmingly been considered as referring to the absent i e to someone outside the communication situation other than the speaker or the hearer the nonperson By broadening the scope and finally integrating the third person we come to understand *The Politics of Person Reference* fully and to see the strategic argumentative and dialogical nature of the act of referring to other discourse participants understood as the act of creating new referents

Aspects of Natural Language Processing Malgorzata Marciniak, Agnieszka Mykowiecka, 2009-10-01 For many years Leonard Bolc has played an important role in the Polish computer science community He is especially known for his clear vision in the development of artificial intelligence inspiring research organizational and editorial achievements in areas such as e g logic automatic reasoning natural language processing and computer applications of natural language or human like reasoning This Festschrift volume published to honor Leonard Bolc on his 75th birthday includes 17 refereed papers by leading researchers his friends former students and colleagues to celebrate his scientific career The essays present research in the areas which Leonard Bolc and his colleagues investigated during his long scientific career The volume is organized in three parts the first is devoted to logic the domain which was one of the most explored by Leonard Bolc himself The second part contains papers focusing on different aspects of computational linguistics the third part comprises papers describing different applications in which natural language processing or automatic reasoning plays an important role *Meta-informative Centering in Utterances* André Włodarczyk, Hélène Włodarczyk, 2013-12-15 The notion of information has nowadays become crucial both in our daily life and in many branches of science and technology In language studies this notion was used as a technical term for the first

time about at least fifty years ago. It is argued however that Old and New used traditionally for characterising information refer in fact to the meta informative status of communicated chunks of information. They provide information about other information. Since subjects and objects as attention driven phrases are also related to aboutness the presented Meta Informative Centering MIC framework includes predication theory. By applying the MIC theory to their analyses of English German French Polish Russian Greek Latin and Japanese the authors provide comprehensive explanations of the most puzzling aspects of the pragmatic use of basic universal linguistic categories. It seems clear now that canonical syntactic patterns their permutations and diverse transformations do indeed reflect very truly the meta informative encapsulation of utterances. As a consequence this book presents new and coherent theoretical solutions as well as their very efficient applications.

New Approaches to Old Problems Steven N. Dworkin, Dieter Wanner, 2000-11-13 This volume contains revised versions of thirteen of the papers presented at the parasession New Solutions to Old Problems Issues in Romance Historical Linguistics held as part of the 29th Linguistic Symposium on the Romance Languages 1999. These studies examine specific problems in Romance historical linguistics within the framework of new analytical approaches many of which represent extensions into the diachronic realm of methodologies and theories originally formulated to explain aspects of synchronic phonology and syntax. Insights afforded by Principles and Parameters the Minimalist Program Optimality Theory grammaticalization theory and sociohistorical linguistics are used to elucidate such long standing issues in traditional historical grammar as diphthongization in Hispano Romance syncope of intertonic vowels in Hispano and Gallo Romance lenition the role of analogy in morphological change word order infinitival constructions and the collocation of clitic object pronouns in Old French and Old Spanish.

The World's Major Languages Bernard Comrie, 2018-04-17 The World's Major Languages features over 50 of the world's languages and language families. This revised edition includes updated bibliographies for each chapter and up to date census figures. The featured languages have been chosen based on the number of speakers their role as official languages and their cultural and historical importance. Each language is looked at in depth and the chapters provide information on both grammatical features and on salient features of the language's history and cultural role. The World's Major Languages is an accessible and essential reference work for linguists.
