Grammaticalization Cambridge Textbooks In Linguistics:

Grammaticalization Paul J. Hopper, Elizabeth Closs Traugott, 2003-07-31 This is a general introduction to grammaticalization the change whereby lexical terms and constructions come in certain linguistic contexts to serve grammatical functions and once grammaticalized continue to develop new grammatical functions The authors synthesize work from several areas of linguistics The second edition has been thoroughly revised with substantial updates on theoretical and methodological issues that have arisen in the decade since the first edition and includes a significantly expanded bibliography Particular attention is paid to recent debates over directionality in change and the role of grammaticalization in creolization

Grammaticalization and Language Change Kristin

Davidse, Torsten Leuschner, 2012 This collective volume focuses on the latest developments in the study of grammaticalization and related processes of change such as degrammaticalization constructionalization lexicalization and petrification It addresses topical issues relating to the motivations sources defining features and outcomes of these changes New theoretical reflections are offered on the pragmatic motivation of grammaticalization paths process oriented differences between grammaticalization lexicalization and degrammaticalization the question of gradualness and pace of grammaticalization and deictics as a distinct source of grammaticalization The articles describe various constructional and distributional changes affecting deictics determiners reflexives clitics nouns affixes adverbs and auxiliary verbs mainly in the Germanic and Romance languages The volume will be of great interest to historical linguists working on grammaticalization and related changes and to all linguists working on the interface between morphosyntax semantics pragmatics and discourse

Historical Linguistics 1999 Laurel J. Brinton, 2001 This is a selection of papers from the 14th International Conference on Historical Linguistics held August 9-13 1999 at the University of British Columbia From the rich program and the many papers given during this conference the present twenty three papers were carefully selected to display the state of current research in the field of historical linguistics

Grammaticalisation Paths of Have in English Andrzej M. Łęcki, 2010 This book explores the diachronic emergence of the verb have in English in its various grammatical uses The development of grammatical functions of have is analysed from pragmatic semantic morphosyntactic and phonetic angles Apart from the well known and formerly studied cases of the rise of perfect and obligative have the author describes the developments of the had better structure as well as causative have which have not received much scholarly attention thus far He shows that the first examples of the fully grammaticalised constructions with have generally appear earlier than it is commonly believed He also offers possible motivations behind the growth of obligative and causative have This book proves that the changes leading to the rise of new grammatical constructions occur in a specific order pragmatic semantic changes precede morphosyntactic

changes and phonetic reductions are the last to take place *Historical Linguistics 2005* Joseph C. Salmons, Shannon Dubenion-Smith, 2007-08-15 This volume contains 22 revised papers originally presented at the 17th International Conference on Historical Linguistics held August 2005 in Madison Wisconsin USA The papers cover a broad range of languages including well studied languages of Europe but also Aramaic Zoque and Uto Aztecan Japanese and Korean Afrikaans and the Pilbara languages of Australia The theoretical approaches taken are equally diverse often bringing together aspects of formal and functional theories in a single contribution Many of the chapters provide fresh data including several drawing on data from electronic corpora Topics range from traditional comparative reconstruction to prosodic change and the role of processing in syntactic change **Tense and Aspect in the Languages of Europe** Östen Dahl, 2008-08-22 No detailed description available for Tense and Aspect in the Languages of Europe *Focus on English* Hans-Georg Wolf, 2008 **The Development of the Concept of SMELL in American English** Daniela Pettersson-Traba, 2022-10-24 The last decades have witnessed a renewed interest in near synonymy In particular recent distributional corpus based approaches used for semantic analysis have successfully uncovered subtle distinctions in meaning between near synonyms However most studies have dealt with the semantic structure of sets of near synonyms from a synchronic perspective while their diachronic evolution generally has been neglected Against this backdrop the aim of this book is to examine five adjectival near synonyms in the history of American English from the understudied semantic domain of SMELL fragrant perfumed scented sweet scented and sweet smelling Their distribution is analyzed across a wide range of contexts including semantic morphosyntactic and stylistic ones since distributional patterns of this type serve as a proxy for semantic dis similarity The data is submitted to various univariate and multivariate statistical techniques making it possible to uncover fine grained dis similarities among the near synonyms as well as possible changes in their prototypical structures The book sheds valuable light on the diachronic development of lexical near synonyms a dimension that has up to now been relatively disregarded **Trames** ,2007 **The Representation of Speech in Biblical Hebrew Narrative** Cynthia L. Multilingual Practices in Language History Päivi Pahta, Janne Skaffari, Laura Wright, 2017-12-18 Texts of the past were often not monolingual but were produced by and for people with bi or multilingual repertoires the communicative practices witnessed in them therefore reflect ongoing and earlier language contact situations However textbooks and earlier

research tend to display a monolingual bias This collected volume on multilingual practices in historical materials including code switching highlights the importance of a multilingual approach The authors explore multilingualism in hitherto neglected genres periods and areas introduce new methods of locating and analysing multiple languages in various sources and review terminology theories and tools The studies also revisit some of the issues already introduced in previous research such as Latin interacting with European vernaculars and the complex relationship between code switching and lexical borrowing Collectively the contributors show that multilingual practices share many of the same features regardless of time and place and that one way or the other all historical texts are multilingual This book takes the next step in historical multilingualism studies by establishing the relevance of the multilingual approach to understanding language history

Language Change in Real- and Apparent-Time Karen V. Beaman, 2024-03-27 This book makes the case for the value of a combined panel and trend study approach in studying real and apparent time language change to reconcile conspicuous disparities between the individual and the community Through an examination of the Swabian dialect in southwestern Germany in two speech communities over four decades this volume resolves critical methodological challenges in investigating lifespan and community change This work affirms the importance of the speech community in shaping change and demonstrating how speakers notions of local identity and community belonging inform their choice of linguistic variants Drawing on a comprehensive integrated methodology this research brings together diverse approaches for measuring changing social constructs and analyzing linguistic structures using state of the art statistical methods bolstered by participant observer and ethnographic observations Beaman explores indexicalities of identity accommodation and geographic mobility to investigate how predictable sociolinguistic patterns promote variation and influence language change Empirically this volume documents processes of dialect leveling and supraregionalization and the emergence of a Swabian Renaissance among younger well educated urban speakers who leverage the social indexical status of certain linguistic variables to convey social meanings of local prestige and community belonging Methodologically this book offers best practices from a combined panel and trend study demonstrating the compatibility and complementarity of real and apparent time analyses in uncovering the nature rate and dispersion of linguistic change Theoretically this work links intraspeaker lifespan change and interspeaker community change into a holistic approach pushing forward our understanding of the role that orderly heterogeneity plays in language variation and change This book will be of interest to students and scholars in sociolinguistics linguistic anthropology dialectology and historical linguistics

Non-Nuclear Cases Nicole Delbecq, Karen Lahousse, Willy Van Langendonck, 2014-12-15 In contrast with the central arguments of the event structure which have been extensively studied much less attention has been given to non arguments To bridge this gap the present volume focuses on prepositional and adverbial phrases expressing instrumental causal spatial temporal roles and the like i e semantic roles which have been typically associated with oblique case The various contributions show that case in general and oblique case

in particular is at the intersection between form and meaning at issue are the nuclear versus non nuclear status of these phrases and the semantic roles they express The import of these phrases on the event structure is described in a functional cognitive perspective for Cora Nyulnyul German Dutch French and Spanish The specific analyses of empirical phenomena presented in this volume as well as their implications for linguistic theory in general will be of interest for scholars interested in syntax semantics and pragmatics This is the sixth and final volume of the Case and Grammatical Relations across Languages project

Historical Linguistics 2011 Ritsuko Kikusawa, Lawrence A. Reid, 2013-11-14 This volume of selected papers from the 20th International Conference on Historical Linguistics Osaka Japan July 2011 presents a set of stimulating and ground breaking studies on a wide range of languages and language families As the scope of studies that can be characterized as Historical Linguistics has expanded ICHL conferences have likewise seen a broadening of topics presented and this conference was no exception reflected by the inclusion in this volume of a plenary presentation on the grammaticalization of expressions of negation and gendered kinship in American Sign Language Three other papers propose new views of the role of grammaticalization in English Chinese and Niger Congo languages Four of the papers discuss specific problems that arise in the comparison and reconstruction of linguistic features in a range of languages from Asia Europe and South America The last six studies deal with innovative approaches to the historical development of suppletion in Romance languages possessive classifiers in Austronesian universal quantifiers in Germanic adjectival sequences in English exaptation in Celtic and Early English and drift in Ancient Egyptian

An Introduction to Functional Grammar M.A.K. Halliday, Christian M.I.M. Matthiessen, Michael Halliday, Christian Matthiessen, 2014-02-04 This third edition of An Introduction to Functional Grammar has been extensively revised While retaining the organization and coverage of the earlier editions it incorporates a considerable amount of new material

Norwegian Modals Kristin Melum Eide, 2011-12-22 Norwegian Modals is a detailed description of the syntactic and semantic properties of modals in Norwegian Modal verbs in Mainland Scandinavian languages have received much less attention than their English and German counterparts hence this book seizes the opportunity to present a range of new data and generalizations relevant for the study of Scandinavian languages but also for the study of modality in Germanic and other languages The book critically evaluates a range of proposals from the modality literature focusing on the Theta properties and the scopal properties of Modals in Germanic languages and concludes that none of these previous proposals are able to account for the syntax of modals in Norwegian The Theta properties of modals are shown to depend on the construction in which the modal occurs hence neither a raising analysis a control analysis nor a raising versus control analysis in fact suffices to exhaust these properties of Norwegian modals The interplay of modals with tense and aspect is likewise thoroughly investigated presenting a range of data revealing that existing universalist proposals are insufficient to account for even quite regular patterns Instead a new analysis is presented building on a new compositional tense system which exploits aspectual features of predicates and

selectional preferences of modal classes
