The Influence of Catholicism on the Sciences and on the Arts Andrés de Salas y Gilavert, 1900 **The Influence of Catholicism on the Sciences and on the Arts (Classic Reprint)** Mariana Monteiro, 2015-07-12 Excerpt from The Influence of Catholicism on the Sciences and on the Arts It seems incredible that in the so called enlightened nineteenth century there should have been found a single person to attempt to maintain that the Catholic Religion is hostile to the arts and sciences It must needs be that such a person simply closes his eyes to history in order to make so rash and unjust an accusation The modern philosophers supporting their accusations upon some texts of Holy Scripture and of the Holy Fathers falsely interpreted have no hesitation to repeat daily with insolent superiority of manner Is it not evident that the Catholic Religion is opposed to the unfolding of intelligence The attack could not be more gross or more insidious Time has proved the charge to be an absurd accusation and the truly learned men of the day are fully convinced that the Holy Catholic Religion is superior to all others not only on account of the resplendent lights with which she has adorned the world but for the extraordinary and incontestable progress which she has so brilliantly effected in human reason About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Theoretic Life - A Classical Ideal and its Modern Fate Alexander S. Rosenthal-Pubul, 2019-01-01 In this work Alexander Rosenthal Pubul presents a broad examination of the ancient philosophical question What is the good life while

addressing how the liberal arts can help us to answer this question Greek philosophy distinguished between the noble what is good in itself from the merely useful good for something else From thence follows the distinction between the liberal arts which pursue such noble goods and the mechanical arts which are only instrumental For Aristotle the most noble and excellent good is wisdom itself Hence the theoretic life devoted to the love of wisdom for its own sake philosophy is the highest and the most excellent This work theorizes the origins of modernity in a rebellion against this Greek conception resulting in a complete inversion of the classical hierarchy Sir Francis Bacon reconceiving the purpose of knowledge as power enthroned technology over philosophy and the liberal arts The unfolding of the modern Baconian revolution progressively sidelines the liberal arts as practical economic and technical utility become the standard of value In assessing this problem the book engages in a capacious journey across disciplines like philosophy history art politics and science It is also a veritable tour across the Western intellectual tradition including Socrates Plato Aristotle Cicero Seneca Thomas Aquinas Bacon Descartes Hume Kant Nietzsche Dewey Berdyaev Einstein and Heidegger It pleads the urgent need to preserve the humanizing cultural ideals of the ancient classics against the modern tyranny of utility and the dangers of a new barbarism

The Mobilization of Intellect Martha Hanna, 1996 When President Poincaré in the early days of World War I called on the French intellectual elite to contribute to the war effort with their pens and their words the union sacrée of scholars and writers including Henri Bergson Pierre Duhem Ernest Lavisse and Emile Durkheim united French intellect against German Kultur

Social Sciences and Modern States Peter Wagner, 1991-03-28 Modern social sciences have over the past forty years been committed to the improvement of public policy More recently however doubts have arisen about the possibility and desirability of a policy oriented social science In this book leading specialists in the field analyze both the development and failings of policy oriented social science In contrast to other writings on the subject this volume presents a distinctively historical and comparative approach By looking at earlier periods the contributors demonstrate how policy orientation has been central to the emergence and evolution of the social sciences as a form of professional activity Case studies of rarely examined societies such as Poland Brazil and Japan further demonstrate the various ways in which intellectual developments have been shaped by the societal contexts in which they have emerged and how they have taken part in the shaping of these societies

Prayers in Stone Paul Eli Ivey, 1999 The classical revival style of architecture made famous by the 1893 World's Columbian Exposition in Chicago left its mark on one of the most sustained classical building movements in American architectural history the Christian Science church building movement By 1920 every major American city and many smaller towns contained an example of this architecture financed by the followers of Mary Baker Eddy the church's founder These buildings represented a new burgeoning American institution that appealed to business people and to young men and women working to succeed Characterized by middle class congregations that in the early part of the century were over 75 percent women Christian Science suggested radical civic reform solutions based on an idealistic and pragmatic individualism It attracted criticism from traditional churches and from the medical establishment due to its rapid growth and to its reinstatement of primitive Christianity's lost elements of physical healing and moral regeneration Prayers in Stone spins out the close connections between Christian Science church architecture and its social context This architecture served as a focal point for debates over the possibilities for a new twentieth century urban architecture that proponents believed would positively shape the behavior of citizens Thus these buildings played a critical role in discussions concerning religious and secular architecture as major elements of religious and social reform Drawing on a wide range of documentary evidence including material from the archives of the Mother Church in Boston Paul Ivey uses Christian Science architecture to explore the social implications of architectural styles and new building technologies to illuminate class based notions of civic reform and beautification and to investigate the use of architecture to bring about religious and social change In addition the book explores complex gender issues including early attempts to define a professional space for women as Christian Science practitioners Lavishly illustrated Prayers in Stone focuses on four major city arenas of Christian Science building Boston Chicago New York and the San Francisco Bay area to demonstrate the vital intersection of architecture and religion at the so called margins of American society

Classics and Celtic Literary Modernism Gregory Baker, 2022-02-03 Celtic modernism had a complex history with classical reception In this book Gregory Baker examines the work of W B Yeats James Joyce David Jones and Hugh MacDiarmid to show how new forms of modernist literary expression emerged as the evolution of classical education the insurgent power of cultural nationalisms and the

desire for transformative modes of artistic invention converged across Ireland Scotland and Wales Writers on the Celtic fringe sometimes confronted and sometimes consciously advanced crudely ideological manipulations of the inherited past But even as they did so their eccentric ways of using the classics and its residual cultural authority animated new decentered idioms of English literary vernaculars so fragmented and inflected by polyglot intrusion that they expanded the range of Anglophone literature and left in their wake compelling stories for a new age This title is also available as Open Access on Cambridge Core
