The Era of Longevity Dongsheng Chen, 2023-03-17 This is an open access book under CC BY NC ND. This open access book is a comprehensive solution proposed by Dr Chen Dongsheng for the issues of medical care, pension and fund raising in the era of longevity. This book studies the relationship among aging population, economic development and business model innovation. It integrates multi-disciplinary, multi-industry and multi-professional research and thinking to focus on how to meet the challenge of aging population from a business perspective. The author analyzes the keys and experience for Taikang to get successful in this area. The arrival of the Era of Longevity not only creates new business opportunities but also changes the economy, governance and cultural ecology of the society. It is of interest to the readers in business and policy making.

Medical Technology in Japan Christa Altenstetter, 2017-09-08 Japan is suffering from a device gap. Compared to its American and European counterparts, Japan lags in adopting innovative medical devices and making new treatments and procedures available to its patients. Many blame its government and bureaucracy for Japan's delayed access to modern medicine and new medical devices. Christa Altenstetter examines the contextual, social, historical and political conditions of Japan's medical field to make sense of the state of the country's medical profession and its regulatory framework. She explores the development of regulatory frameworks and considers possibilities for eventual reform and modernization. More specifically, Altenstetter looks into how physicians and device companies connect to the government and bureaucracy, the relationships connecting Japanese patients to their medical system and governmental bureaucracy and how the relationships between policymakers and the medical profession are changing. The issues addressed here are becoming increasingly relevant as numerous countries in Asia, Latin America and Central and Eastern Europe are only now beginning to regulate medical technology following the lead of the US and the European Union. Those interested in global medicine and Asian studies will find this book both informative and compelling.

Accelerating Japan's Economic Growth F. Gerard Adams, Lawrence R. Klein, Kumasaka Yuzo, Shinozaki Akihiko, 2007-09-12 This volume presents an up-to-date study of the current state and future of Japanese economic growth, arguing that an information and communications technology revolution could revive Japanese economic growth.

Digital Transformation and the World Economy Andrei Rudskoi, Askar Akaev, Tessa Devezas, 2022-01-24 Nanotechnology, biotechnology, information technology and cognitive sciences are contributing to the emergence of intelligent computers and robots with elements of artificial intelligence and intelligent machines. This book postulates that these developments are accelerating the technological substitution of jobs and the shift in labor demand towards high qualification levels, putting the jobs of lower skilled labor at

risk The digital economy is poised to increase the demand for highly qualified specialists in STEM fields scientific research innovative technologies engineering and mathematics serving digital technologies In addition highly skilled robotics engineers AI and machine learning specialists and virtual and augmented reality architects will be required This book using sector focused mathematical models explores how the demand for specialized human capital will play a decisive role in increasing the efficiency and productivity of labor in the digital economy Success is guaranteed to those entrepreneurs who manage to establish a successful process of interaction with intelligent machines which will require a deep restructuring of the training system for the digital economy The Advanced Materials Revolution and the Japanese System of Innovation

Helena M. M. Lastres,2016-07-27 The book develops the idea that a shift in the techno economic paradigm creates opportunities for the rise of new firms industries and countries to technological leadership making the adoption of an adequate national system of innovation fundamental to success in such changes This task is supported by a case study of how the Japanese System of Innovation has responded to the advanced materials revolution of the last two decades as well as diffusion of the information technology paradigm *The Economics of Industrial Innovation* Chris Freeman,2012-07-26 First published in 1997 Massive technological development has changed the face of industry dramatically This text provides an analysis of the trends and dynamics of innovation in industry It has been updated with recent statistical information and examples A new section explores the debate surrounding macroeconomics in an analysis of the impact of globalization on industrial change This book covers such topics as the rise of science related technology innovations and the firms

macroeconomics of innovation and innovation and public policies **The Learning Economy and the Economics of Hope** Bengt-Åke Lundvall,2016-12-01 The Learning Economy and the Economics of Hope brings together contributions by an expert on policies management and economics of innovation and knowledge It offers original insights in processes of innovation and learning and it draws implications for economic theory and public policy It introduces the reader to important concepts such as innovation systems and the learning economy It throws a new light on economic development and opens up for a new kind of economics the economics of hope It offers a fresh perspective on many of the most important global challenges of today showing how full attention to the characteristics of the learning economy needs to be combined with innovation in global governance if we want to be able to handle these challenges The Learning Economy and the Economics of Hope presents work published between 1985 and 1992 and introduces the core concepts innovation as an interactive process The analysis demonstrates that new technology is developed in an interaction between individuals and organisations and that innovation would not thrive in an economy similar to textbook models of pure markets and perfect competition It also presents articles that were published between 2004 and 2010 These may be seen as further developments and evidence based consolidation of ideas that were presented more than ten years earlier It presents the learning economy through the perspective of the economics of knowledge The concluding part of the book includes three papers that make use of the

conceptual frameworks developed in an analysis of China's innovation system and policy Europe's crisis and Africa's underdevelopment **The Economics of Industrial Innovation** Christopher Freeman, Luc Soete, 1997 In the new chapters they deal with the international dimensions of technological change including underdevelopment technology transfer international trade and globalization They have also strengthened the historical account of the rise of new technologies a main feature of earlier editions *The Japanese Economy*, 2004
