Equine assisted therapy is a novel experiential treatment approach showing significant promise for adults, children and youth across a range of mental health problems. These treatments use a horse or horses to facilitate communication and mindful awareness of thoughts, emotions and behaviors in an experientially oriented approach via groundwork or riding. Interactions with horses have shown to foster emotional regulation, self confidence, reflection and insight by which well being is facilitated. The current book describes the rationale for these treatments, adds to the knowledge about recent progress in applying them to posttraumatic stress disorder, PTSD, anxiety, attention deficit hyperactivity disorder, ADHD and more, and analyzes the nature of the bonding between humans and equines which makes these relationships so therapeutic and healing.
