

GROVE RTGOS SELF-PROPELLED HYDRAULIC CRANE 13 TON CAPACITY

HYDRAULIC
CRANES

ROUGH TERRAIN MOBILITY ... An exclusive hydraulic suspension system with four wheels allows the crane to travel over the roughest terrain. An optional hydraulic differential for the rear axle is also available. New gear and hydraulic pump design have provided more efficiency when traveling.

TERRAIN-ADJUSTED CAB DESIGNED FOR OPERATOR COMFORT ... There is never a hard spot for the operator as the cab works with the terrain, keeping the operator facing the load at all times. The cab features a large forged, steel chassis, a 360-degree front windshield and sliding side and rear windows for ventilation. Belting and noise controls for quality of travel and are designed in a consistent Grove pattern for operator acceptance.

SMOOTH POWER UPFS ... Grove's planetary gear drive, torque converter and pump, is standard. Most lifting speeds can be controlled from zero to 100 ft/min at 100% of rated capacity.

TOOL STORAGE is provided in a large storage bin for tool located forward in the chassis deck.

THE HIGHER LOAD MOMENT INDICATOR AND AUTO-TWO-BLINDER SYSTEM improves operator control operational factors of the crane and enhances their work when they together while providing the operator with a continuous visual display of crane load. Directly measuring the rope drum structural moment with roller loadsticks, an integral load and moment warning system alerts the operator if an overload or two-blinder condition exists. After the Grove automatic de-power circuitry shuts the air flow from these functions when conditions are not met, the operator is alerted by the sound of only these crane functions that all require the situation.
