

MATHEMATICS GRADE 11 NOTES

EXAMPLES:

Example 1

$$(x-3)(x+5) = 9$$

$$x^2 + 5x - 3x - 15 - 9 = 0$$

$$x^2 + 2x - 24 = 0$$

$$(x+6)(x-4) = 0$$

$$x = -6 \text{ or } x = 4$$

Example 2

Solve for x :

$$\sqrt{x-2} + x = 4$$

$$\sqrt{x-2} = 4 - x$$

$$x-2 = (4-x)^2$$

$$x-2 = 16-8x+x^2$$

$$x^2 - 8x + 16 - x + 2 = 0$$

$$x^2 - 9x + 18 = 0$$

$$(x-3)(x-6) = 0$$

$$x = 3 \quad \text{or} \quad x = 6$$

after checking both solutions

$x = 3$ is the only solution

Example 3

Solve for x :

$$15x - 4 > 9x^2$$

$$15x - 4 - 9x^2 > 0$$

$$9x^2 - 15x + 4 < 0$$

$$(3x-1)(3x-4) < 0$$

$$\frac{1}{3} < x < \frac{4}{3}$$

Caught in the Act Cyril Julie, Lorna Holtman, Charles R. Smith, 2019-12-11 The research reported in *Caught in the Act* draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in South Africa The chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously The book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education The book is of interest to mathematics teachers school leaders mathematics curriculum advisors policy makers and researchers *How to Grade for Learning* Ken O'Connor, 2017-10-04 With more than 50 000 books sold this resource for teachers and school teams will open illuminating and productive new visions of how to improve grading practices **The State of the System** Paul W. Bennett, 2020-09-23 Over the last fifty years Canada s public schools have been absorbed into a modern education system that functions much like Max Weber s infamous iron cage Crying out for democratic school level reform the system is now a centralized bureaucratic fortress that every year becomes softer on standards for students less accessible to parents further out of touch with communities and surprisingly unresponsive to classroom teachers Exploring the nature of the Canadian education order in all its dimensions *The State of the System* explains how public schools came to be so bureaucratic confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces and addresses the need for systemic reform Going beyond a diagnosis of the stresses strains and ills present in the system Paul Bennett proposes a bold plan to re engineer schools on a more human scale as the first step in truly reforming public education In place of school consolidation and managerialism one size fits all uniformity limited school choice and the success for all curriculum Bennett advocates for a new set of priorities decentralize school governance deprogram education ministries and school districts listen to parents and teachers and revitalize local education democracy Tackling the thorny issues besetting contemporary school systems in Canada *The State of the System* issues a clarion call for more responsive engaged and accountable public schools *Inclusive Mathematics Education* David Kollosche, Renato Marcone, Michel Knigge, Miriam Godoy Penteado, Ole Skovsmose, 2019-03-25 The book provides an overview of state of the art research from Brazil and Germany in the field of inclusive mathematics education Originated from a research cooperation between two countries where inclusive education in mathematics has been a major challenge this volume seeks to make recent research findings available to the international community of mathematics teachers and researchers In the book the authors cover a wide variety of special needs that learners of mathematics may have in inclusive settings They present theoretical frameworks and methodological approaches for research and practice **Research for Educational Change** Jill Adler, Anna Sfard, 2016-06-17 Research for Educational

Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

Failure Vicki E. Alger,2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book Failure The Federal Miseducation of America s Children As its title indicates Failure makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution s implication that education must remain the domain only of state and local governments and private institutions Most of all the central government s pervasive meddling in education has failed America s school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark Failure helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what s gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from Failure s history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations Failure might even succeed in reframing the way the federal education establishment thinks about education policy

Don't Send Him in Tomorrow Jarlath O'Brien, 2016-08-04 In

Don't Send Him in Tomorrow Jarlath O'Brien shines a light on the marginalised disenfranchised and forgotten children of today's schools. The percentage of children achieving the government's expected standard in benchmark tests is national news every year. The progress that children with learning difficulties and SEN make is never discussed because it is not understood. That is a problem. The bone crushing infrastructure which professionals have to negotiate is a problem. The fact that so many parents have to fight tooth and nail so that the needs of their children are met something the rest of us would consider a basic entitlement is a problem. This book describes how the system can be improved if and when these marginalised children are given higher priority by the powers that be. There is a widespread lack of understanding about special schools, the work they do and the children they educate. The sector is largely invisible. Jarlath O'Brien has become increasingly frustrated by this and the varying quality of provision for children with learning difficulties and SEN in mainstream schools. The successes of special schools and pupil referral units in Ofsted inspections are just not celebrated or analysed in the same way that mainstream schools are. While mainstream schools have their hands tied by fears over progress measures, there is a human cost to the accountability culture that reduces schooling to data and judgements; this is felt most profoundly by children with SEN and their families. Jarlath shares some of the problems he's witnessed with inclusion and exclusion: mainstream schools actively encouraging children with SEN to look elsewhere; parents reporting their children have been formally or informally excluded from school and socially excluded by the parents of other children; children asked to leave their mainstream schools because of their behaviour, usually behaviour that is caused by their needs not being adequately addressed; children who are in school but isolated from their peers. If a child can't participate in activities or trips with the rest of the class or spends much of the day working one to one with a teaching assistant, is this really inclusion? The Pupil Premium has been established to ensure that children in receipt of free school meals are not disadvantaged; why does something similar not exist for children with SEN? Every health and wealth indicator that you could use to measure people with learning difficulties and special educational needs, SEN reveals something alarming. They die younger. They work less. They are more likely to live in poverty or end up in prison or face mental health difficulties. They are much more likely to be excluded from school. They are more likely to be bullied at school. This has to end. We all have to choose to commit to recognising that society as it is today is a difficult place for young people to thrive. When you have autism or Down syndrome or any physical or learning difference, it's even harder and the system as it stands isn't helping. We need to acknowledge that this is not right; that such a state of affairs must change and that we all have a part to play in making that change happen. Jarlath offers suggestions for politicians, Ofsted, local authorities, head teachers, SENCOs, teachers and teaching assistants about what they can do to make a difference. For all politicians, head teachers, SENCOs, teachers and parents.
