rate constitutive equations the theory of hyperelastic based plasticity models and small and large deformation viscoelasticity Of great interest to researchers and graduate students in various branches of engineering especially civil aeronautical and mechanical and applied mathematics **Numerical Study of Rarefied Hypersonic Flow Interacting with a Continuum Jet**

Christopher E. Glass,2000 An uncoupled CFD DSMC technique is developed and applied to provide solutions for continuum jets interacting with rarefield external flows The technique is based on a correlation of the appropriate Bird breakdown parameter for a transitional rarefield condition that defines a surface within which the continuum solution is unaffected by the external flow jet interaction The method is applied to two problems to assess and demonstrate its validity one of a jet interaction in the transitional rarefied flow regime and the other in the moderately rarefield regime Results show that the appropriate Bird breakdown surface for uncoupling the continuum and non continuum solutions is a function of a non dimensional parameter relating the momentum flux and collisionality between the two interacting flows
