Heavy Crude Oil Recovery E. Okandan, 2012-12-06 Within the last 10 years the world has come to a point where the easily explorable oil deposits have now been found and it is anticipated that such deposits will be depleted by the beginning of the Twenty first Century However the increasing demand of man kind for energy has caused technologists to look into ways of finding new sources or to reevaluate unconventional sources which in the past have not been economical In this respect heavy crude and tar sand oils are becoming important in fulfilling the world's energy requirements What are heavy crude and tar sand oils There is still some confusion as to their definitions inasmuch as they vary among organizations and countries In an effort to set agreed meanings UNITAR in a meeting in February 1982 in Venezuela proposed the following definitions see also Table 1 1 Heavy crude oil and tar sand oil are petroleum or petroleum like liquids or semi solids naturally occurring in porous media The porous media are sands sandstone and carbonate rocks 2 These oils will be characterized by viscosity and density Viscosity will be used to define heavy crude oil and tar sand oil and density oAPI will be used when viscosity measurements are not available 3 Heavy crude oil has a gas free viscosity of 100 10000 mPa s cp 3 o at reservoir temperatures or a density of 943 kg m 20 API 3 o o to 1000 kg m 10 API at 15 6 C and at atmospheric pressure

Ostrowsky, E. Spitz, 1971-01-31 As optical fiber communication systems have moved out of the laboratory and into commercial use over the past several years the general field of guided wave and coherent optics has undergone a radical transformation Research in optical communication has turned heavily towards single mode technology and totally new phenomena and applications of the existing technology outside the communication field have begun to proliferate It was for this reason that we decided to organize a NATO Advanced Study Institute assembling the leading workers in this new domain in order to define the state of the art and develop an idea of the new directions the field might take The lectures and

seminars presented at this Advanced Study Institute form the basis for this book. The subjects treated can be roughly grouped as New phenomena in optical fibers such as non linear effects soliton propagation and polarization conservation New applications of fibers to measurements of rotation pressure temperature etc and medical uses Advanced and exploratory work on single mode fiber communication systems including the use of coherent transmission schemes and optical amplification Recent developments of optical information treatment based on four wave mixing Integrated optical devices and technologies including bistable devices parametric oscillators and optical logic In addition to these major topics a number of national reviews and specialized seminars treating new guided wave structures and materials are included The co editors admit being rather pleased with the result
