Surface Chemistry Georgios M. Kontogeorgis, Soren Kiil, 2016-03-28 Colloid and Surface Chemistry is a subject of immense importance and implications both to our everyday life and numerous industrial sectors ranging from coatings and materials to medicine and biotechnology How do detergents really clean Why can't we just use water Why is milk milky Why do we use eggs so often for making sauces Can we deliver drugs in better and controlled ways Coating industries wish to manufacture improved coatings e.g. for providing corrosion resistance which are also environmentally friendly i.e. less based on organic solvents and if possible exclusively on water Food companies want to develop healthy tasty but also long lasting food products which appeal to the environmental authorities and the consumer Detergent and enzyme companies are working to develop improved formulations which clean more persistent stains at lower temperatures and amounts to the benefit of both the environment and our pocket Cosmetics is also big business Creams lotions and other personal care products are really just complex emulsions All of the above can be explained by the principles and methods of colloid and surface chemistry A course on this topic is truly valuable to chemists chemical engineers biologists material and food scientists and many more
