

Halliburton Velocity™ Revolve Gun System

INDUSTRY'S MOST ACCURATE, COMPACT, AND VERSATILE SYSTEM FOR ORIENTING PERFORATIONS IN FIBER-OPTIC COMPLETIONS

OVERVIEW

With the increase of fiber-optic installations in unconventional wells to achieve better understandings of well completions and production, the need to accurately orient perforations to avoid damaging fiber-optic cable is critical. Unintentionally damaging the fiber-optic hardware can negatively impact the well's treatment and production diagnostics. While oriented perforating is not a new concept, existing solutions have been either unreliable, inefficient, or uneconomic.

The Halliburton Velocity™ Revolve oriented gun system gives operators the ability to confidently orient perforations within 5° of the desired perforating azimuth, which is more precise than the leading competitive system on the market. The ability to align the perforating charge tube by using internally oriented components eliminates the need for externally oriented hardware, such as eccentric weight bars, which can also increase complexity and unreliability.

As the first internally oriented, fully modular guns on the market, Velocity™ Revolve guns eliminate the need for additional hardware and failure-prone components. Traditionally oriented perforating jobs can require additional equipment and personnel on location to prepare the gun string and to clean hardware in between each run, and this requirement can have a negative impact on overall frac efficiency. Velocity™ Revolve guns are pre-loaded and aligned prior to shipping and can be delivered directly to a wellsite. Upon arrival of the Velocity™ Revolve gun system, a wireline crew only needs to insert a detonator and assemble the final bottomhole assembly (BHA) before running it in hole.

Legacy oriented perforating methods can decrease the overall efficiency of a frac job by as much as 67%, which can increase the cost of the completion spread by hundreds of thousands of dollars over the course of a well. Another gap in legacy oriented systems has been the additional hardware length that is often required, along with potential limitations in the perforating charge performance specifications. Oriented Velocity™ Revolve guns are up to 35% shorter than competitive gun systems and are better suited for more common industry-standard perforation charges, with a wider range of entry hole diameter specifications.

FEATURES

- Orients charges within 5° of the desired angle
- Orientation unaffected by wellbore conditions
- Modular, disposable platform
- Shorter length than competing systems
- Broader portfolio of charge options than traditional gun systems

BENEFITS

- Provides the most accurate and efficient internally oriented system in the industry
- Offers the lowest total perforating cost for fiber-optic completions
- Eliminates the tasks of redressing and cleaning equipment
- Reduces the amount of equipment and personnel required to be on location

Halliburton Quality System Manual

Barry S. Smith

Halliburton Quality System Manual:

Eventually, you will very discover a additional experience and deed by spending more cash. nevertheless when? complete you take on that you require to get those every needs past having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will lead you to comprehend even more roughly speaking the globe, experience, some places, once history, amusement, and a lot more?

It is your categorically own times to pretend reviewing habit. along with guides you could enjoy now is **Halliburton Quality System Manual** below.
