,2001-10 *Excel HSC Survival Guide* Pascal Press Staff,1996 **The Control War** Martin G. Clemis,2018-04-26 The Vietnam War a conflict defined by an ever evolving mixture of conventional and guerrilla warfare and mass politics has often been called a war without fronts In fact Vietnam had a multitude of fronts as insurgents and counterinsurgents wrestled for control throughout 44 provinces 250 districts and more than 11 000 hamlets In *The Control War* Martin G Clemis focuses on South Vietnam where a highly complex politico military struggle fragmented the battlefield along countless divergent points of conflict as both sides sought spatial and political hegemony Complicating the conventional view that the Vietnam War was about winning hearts and minds Clemis argues that both sides were more interested in asserting control over the people and resources of the countryside As in other revolutionary civil conflicts the key to winning political power in South Vietnam was to control the physical world of territory population and resources as well as the ideational world of political organization and long term legitimacy Despite their countervailing purposes both insurgency and pacification provided the means to exert this control Proponents of each approach pursued the same goals relying on a blend of military force political violence and socioeconomic policy to achieve them Revealing the unique spatiality of the Vietnam War *The Control War* analyzes the ways that both sides of the conflict conceptualized and used geography and the environment to serve strategic tactical and political ends Clemis shows us that the operational environment of Vietnam both natural and human made was far more than a backdrop to two decades of war
