Handbook of Nutrition and Ophthalmology Richard David Semba, 2007-12-06 The Nutrition and Health series of books have as an overriding mission to provide health professionals with texts that are considered essential because each includes

- 1 a synthesis of the state of the science
- 2 timely in depth reviews by the leading researchers in their respective fields
- 3 extensive up to date fully annotated reference lists
- 4 a detailed index
- 5 relevant tables and figures
- 6 identification of paradigm shifts and the consequences
- 7 virtually no overlap of information between chapters but targeted inter chapter referrals
- 8 suggestions of areas for future research and
- 9 balanced data driven answers to patient health professionals questions which are based upon the totality of evidence rather than the findings of any single study

The series volumes are

not the outcome of a symposium Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter as well as in the organization of their volume The international perspective especially with regard to public health initiatives is emphasized where appropriate The editors whose trainings are both research and practice oriented have the opportunity to develop a primary objective for their book define the scope and focus and then may invite the leading authorities from around the world to be part of their initiative The editor authors are encouraged to provide an overview of the field discuss their own research and relate the research findings to potential human health consequences
