Handbook Of Identity Theory And Research 2 Volume Set:

Handbook of Identity Theory and Research Seth J. Schwartz, Koen Luyckx, Vivian L. Vignoles, 2011-06-22 Identity is one of the most extensively studied constructs in the social sciences. Yet despite the wealth of findings across many disciplines, identity researchers remain divided over such enduring fundamental questions as: What exactly is identity and how do identity processes function? Do people have a single identity or multiple identities? Is identity individually or collectively oriented? Personally or socially constructed? Stable or constantly in flux? The Handbook of Identity Theory and Research offers the rare opportunity to address the questions and reconcile these seeming contradictions, bringing unity and clarity to a diverse and fragmented literature. This exhaustive reference work emphasizes the depth and complexity of identity processes and domains and presents perspectives from many different theoretical schools and empirical approaches. Contributing authors provide perspectives from psychology (e.g., narrative social identity theory, neo-Eriksonian) and from other disciplines (e.g., sociology, political science, ethnic studies), and the editors highlight the links between chapters that provide complementary insights on related subjects. In addition to covering identity processes and categories that are well known to the field, the Handbook tackles many emerging issues, including: Identity development among adopted persons; Identity processes in interpersonal relationships; Effects of globalization on cultural identity; Transgender experience and identity; Consumer identity and shopping behavior; Social identity processes in xenophobia and genocide. The Handbook of Identity Theory and Research lends itself to a wealth of uses by scholars, clinicians, and graduate students across many disciplines, including: social developmental and child school psychology; human development and family studies; sociology; cultural anthropology; gender, ethnic, and communication studies; education and counseling.

Occupational Therapies Without Borders E-Book Dikaios Sakellariou, Nick Pollard, 2016-09-23 The new edition of this landmark international work builds on the previous two volumes, offering a window onto occupational therapy practice, theory, and ideas in different cultures and geographies. It also illustrates how occupational therapists from all over the world can affect positive changes by engaging with political and historical contexts. Divided into six sections, the new edition begins by analyzing the key concepts outlined throughout, along with an overview on the importance and practicalities of monitoring and evaluation in community projects. Section Two explores occupation and justice, emphasizing that issues of occupational injustice are present everywhere in different forms, from clinical settings to community-based rehabilitation. Section Three covers the enactment of different Occupational Therapies, with a focus on the multiplicity of occupational therapy from the intimately personal to the broadly political. The influence of clients on the social identities within the audit profession Johanna Sylvander, 2020-03-02 The overall purpose of the thesis is to explore the meaning of professionalism and independence for the individuals within the audit arena Professionalism is defined as the occupational values that guide auditors professional behaviour and how independence is understood is assumed to be influenced by the social groups the auditors identify with The audit arena consists of several social actors i e the audit profession audit firms and auditors as well as external constituencies of the profession i e accountors and accountees The audit profession both serves the public interest by quality ensuring the information provided by the accountors to the accountees as well as conducts business in a state sanctioned monopoly like market Appearing independent and professional is therefore critical for the profession as independence and professionalism is the basis of society s trust in the profession and may particularly influence the profession s ability to recruit and retain staff The audit profession audit firms offices and audit teams are social groups which influence the values attitudes and behaviours of the auditors through the process of socialization into the profession and the audit firm However accountors i e clients and accountees i e stakeholders such as investors are also social actors who may influence the values attitudes and behaviour of auditors if auditors identify with these social actors Exploring the social identities at play within the audit arena enables us to more fully understand the values that guide professional work The

thesis empirically investigates the social identity audit arena through potential current and former audit employees perceptions of the audit arena where the data is both qualitative interviews and quantitative surveys in nature The empirical material provides both pre socialized and post socialized perspectives on the audit arena where the bulk of the material stems from the pre socialized perspective The thesis suggests that there are two types of auditors namely small client auditors and large client auditors where the small client auditor group dominates the audit arena The role of the small client auditor is described differently from the large public client auditor s role The small client auditor is perceived as a teacher who helps the clients run their businesses better and avoid problems with tax authorities et cetera making it necessary for the auditor to have a good and close relationship with the client in order to fulfil her his role The large client auditor is described more as having the traditional guardians of the market role Hence it seems as the small client auditor is guided by other values and has a different understanding of independence compared to the large client auditor However the large client auditor is also perceived as having a counselling teacher role indicating that some professional values are shared by small client and large client auditors These different roles auditors are perceived to have where independence and working for the public interest seem to mean different things can influence how new audit employees perceive the profession If employees expect to work as large client auditors but instead experience work being guided by small client auditor values or vice versa it may influence the willingness to stay in the profession These two roles are also a potential factor influencing the expectation gap i e the gap between what society thinks the auditor does and what s he does in practice These two roles may therefore influence society s image of the auditor and where the profession may have issues in appearing independent in the relationship with small clients
