Harnessing Globalization The Promotion Of Nontraditional Foreign Direct Investment In Latin America:

Harnessing Globalization Roy C. Nelson, 2009 *Harnessing Globalization* Roy C. Nelson, 2012-01-31 How can countries in the underdeveloped world position themselves to take best advantage of the positive economic benefits of globalization One avenue to success is the harnessing of foreign direct investment FDI in the nontraditional forms of the high technology and service sectors where an educated workforce is essential and the spillover effects to other sectors are potentially very beneficial In this book Roy Nelson compares efforts in three Latin American countries Brazil Chile and Costa Rica to attract nontraditional FDI and analyzes the reasons for their relative success or failure As a further comparison he uses the successes of FDI promotion in Ireland and Singapore to help refine the analysis His study shows that two factors in particular are critical First is the government's autonomy from special interest groups both domestic and foreign arising from the level of political security enjoyed by government leaders The second factor is the government's ability to learn about prospective investors and the inducements that are most important to them what he calls transnational learning capacity Nelson draws lessons from his analysis for how governments might develop more effective strategies for attracting nontraditional FDI

Foreign Direct Investment and Development Theodore Moran, 2011-04-15 This volume is the culmination of Institute investigations on the relationship between foreign direct investment FDI and development Today more than one third of world trade takes place in the form of intrafirm transactions that is trade among the various parts of the same corporate network spread across borders and the bulk of technology is transferred within the confines of integrated international production systems This means that FDI and the operations of multinational corporations have become central to the world economy at large Nowhere is this more important than for developing countries But as Theodore Moran argues in this new volume FDI is not a single phenomenon FDI has such different impacts in the extractive sector infrastructure manufacturing and assembly and services and presents such distinctive policy challenges that each broad category of FDI must be treated on its own terms Indeed past studies that have aggregated all FDI flows together to try to find some unique relationship to host country growth or welfare have led to unreliable substantive findings and sometimes mistaken policy conclusions Moran examines each of the principal forms of FDI extracts the best from previous analysis and offers new findings and perspectives about how benefits from FDI in each sector can be enhanced and potential damages limited or eliminated

Ecotourism Development in Costa Rica Andrew P. Miller, 2012-08-17 Ecotourism Development in Costa Rica The Search for Oro Verde by Andrew P Miller examines the use of ecotourism as a development strategy in Costa Rica and its applicability to other Central American states Ecotourism provides an important environmental check on industry giving the environment a voice by making its preservation an economic necessity due to the number of people who derive their income from it The move away from agriculture to ecotourism is a natural fit because many of those who are engaged in agriculture have extensive knowledge of plants and animals that can be utilized by the ecotourism industry The use of ecotourism as a development strategy is distinctive For ecotourism to succeed it must preserve the natural environment but it must do so in a way that does not preclude growth in other sectors of the economy Miller shows how the successful pursuit of foreign direct investment coupled with Costa Rica's immense biodiversity and its attractiveness to tourists is key to understanding the success of the Costa Rican economy Many of the preferences that ecotourists have for a vacation destination also help create an amenable atmosphere for business These factors include political and social stability high quality of life low levels of corruption economic freedom high levels of education and a suitable infrastructure The most important part of this research is its development of strategies based upon the Costa Rican model that would be useful for other states in the region When looking at whether states can replicate the development strategy of Costa Rica environmental sustainability is an important

concern Ecotourism Development in Costa Rica is an essential text for students and scholars interested in Latin American politics and history development studies and environmental sustainability

The Political Economy of Latin America Peter Kingstone, 2018-03-09 This brief text offers an unbiased reflection on debates about neoliberalism and its alternatives in Latin America with an emphasis on the institutional puzzle that underlies the region's difficulties with democratization and development In addition to providing an overview of this key element of the Latin American political economy Peter Kingstone also advances the argument that both state led and market led solutions depend on effective institutions but little is known about how and why they emerge Kingstone offers a unique contribution by mapping out the problem of how to

understand institutions why they are created and why Latin American ones limit democratic development This timely and thorough update includes A fresh discussion of the commodity boom in the region and the resulting Golden Era in Latin America The recent explosion of social policy innovation and concerns about the durability of social reform after the boom A discussion of the knowledge economy and the limits to economic growth with case studies of successful examples of fostering innovation *Globalizing Innovation* Patrick J.W. Egan,2018-01-12 The impact of host country institutions and policy on innovation by multinational firms in emerging economies In the past multinational firms have looked to developing countries as sources of raw materials markets or production efficiencies but rarely as locations for innovation Today however R but Egan finds host country institutions and the configuration of the host country s investment policies have a strong impact on firm decisions and evolving country investment profiles Egan uses econometric analysis to identify determinants of multinational innovation and examines differences among state institutions as a key variable He then offers a detailed case study assessing Ireland s attempts to use foreign direct investment in innovation as a catalyst for development While FDI is a potential vehicle for industrial upgrading Egan cautions it is neither necessary nor sufficient for development Furthermore innovation intensive investments are not likely to develop linkages with local actors or otherwise embed themselves in host economies in the absence of active discriminating policies channeled through coherent and coordinated institutions
