The History of American Higher Education

Roger L. Geiger,2016-09-06 This book tells the compelling saga of American higher education from the founding of Harvard College in 1636 to the outbreak of World War II The author traces how colleges and universities were shaped by the shifting influences of culture the emergence of new career opportunities and the unrelenting advancement of knowledge He describes how colonial colleges developed a unified yet diverse educational tradition capable of weathering the social upheaval of the Revolution as well as the evangelical fervor of the Second Great Awakening He shows how the character of college education in different regions diverged significantly in the years leading up to the Civil War for example the state universities of the antebellum South were dominated by the sons of planters and their culture and how higher education was later revolutionized by the land grant movement the growth of academic professionalism and the transformation of campus life by students By the beginning of the Second World War the standard American university had taken shape setting the stage for the postwar education boom The author moves through each era exploring the growth of higher education

Architecture & Academe Bryant Franklin Tolles,2011 The unique and influential architecture of sixteen New England colleges **A Critical History of Contemporary Architecture** Elie G. Haddad,David Rifkind,2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **American Academic Cultures** Paul H.

Mattingly,2017-11-23 At a time when American higher education seems ever more to be reflecting on its purpose and potential we are more inclined than ever to look to its history for context and inspiration But that history only helps Paul H Mattingly argues if it is seen as something more than a linear progress through time With *American Academic Cultures* he offers a different type of history of American higher learning showing how its current state is the product of different varied generational cultures each grounded in its own moment in time and driven by historically distinct values that generated specific problems and responses Mattingly sketches out seven broad generational cultures evangelical Jeffersonian republican nondenominational industrially driven progressively pragmatic internationally minded and the current corporate model What we see through his close analysis of each of these cultures in their historical moments is that the politics of higher education both inside and outside institutions are ultimately driven by the dominant culture of the time By looking at the history of higher education in this new way Mattingly opens our eyes to our own moment and the part its culture plays in

Architecture and the Arts and Crafts

Movement in Boston Maureen Meister, 2003 H Langford Warren 1857-1917 was an important link in the chain of individuals who contributed to the architectural practice theories of design and the teaching of architectural history in the United States at the turn of the twentieth century. Best known in the Boston area, Warren first worked under the renowned architect Henry Hobson Richardson before establishing his own practice. Friends and colleagues during this period included Charles Eliot Norton, the noted art historian, and Harvard's Charles Herbert Moore, a leading Ruskinian painter. Hired by Harvard University in 1893, Warren developed its architectural curriculum. In 1897, he helped found Boston's Society of Arts and Crafts. At the time of his death in 1917, Warren was Dean of the School of Architecture at Harvard and President of the Society of Arts and Crafts. At the turn of the century, Warren's philosophical vision offered a conservative and ethnocentric perspective attractive to many Bostonians and to a significant segment of Americans nationwide. According to this view, English culture was the basis of American culture. Through his work at Harvard and in the Arts and Crafts movement, he articulated and promoted an aesthetic guided by an attachment to the past, and he encouraged his students at Harvard to revive and reinterpret English and Anglo-American models. Another characteristic of Warren's aesthetic was restraint, a quality generally attributed to the region's Puritan settlers. Restraint also meant a rejection of both the lavish ornamentation of the *Ecole des Beaux Arts* in Paris and the more original styles such as Art Nouveau that were emerging at the turn of the century. Following the ideals of John Ruskin, William Morris, and later leaders of the English Arts and Crafts movement, Warren and his architect colleagues promoted a close collaboration with the craftsmen who enhanced their buildings. The resulting building designs represent a significant contribution to the development of American Arts and Crafts architecture, complementing the proto-modern work of designers such as Frank Lloyd Wright. In fact, Arts and Crafts architecture in North America was extremely diverse. Meister examines the greater complexity of this architecture by exploring the eclectic historicism of Warren, a key figure in the movement that was centered in Boston.

History of Higher Education Annual:

2003-2004 Roger L. Geiger, 2011-12-31. *History of Higher Education Annual*, Volume 23, provides insight into the struggle for civil rights and desegregation of Southern higher education, illuminating how this conflict affected private historically black colleges and white denominational colleges while interpreting the dynamics of segregation and desegregation in South Carolina. Other contributions examine town-gown relations for Harvard students in the eighteenth century and the challenge of creating an urban public university in Chicago. Review essays examine the demographic and cultural transformation of British higher education and the curious phenomenon of historical encyclopedias of individual colleges and universities. *History of Higher Education Annual* will be of interest to historians, sociologists, educational policymakers, as well as those concerned with the future of higher education in the United States and throughout the world.
