

MAINTENANCE

 WARNING 	
q	Refer to the safety procedures before carrying out any maintenance or servicing work on the compressor unit.
q	Lethal voltages are used in this equipment. Use extreme caution when carrying out electrical checks. Isolate the power supply before starting any maintenance work.

1. ROUTINE MAINTENANCE

To ensure efficient operation of the compressor the performance must be checked regularly and adjustments made to maintain the correct settings. This section gives the information needed for this purpose.

A condition of the Warranty cover is for the user to ensure that routine maintenance and regular servicing must be carried out as recommended in the 'Maintenance Schedule' and an accurate record is kept of the work.

All CompAir BroomWade compressors are fitted with high performance filtration equipment. If the working environment is particularly dusty the filter elements and the heat exchangers will require more frequent attention.

1.1 Cleanliness

The compressor must be kept in a clean condition at all times. Make regular inspections for signs of damage, excessive wear and security of fittings. Ensure that any oil spillage is wiped up immediately and any residual oil cleaned from external surfaces.

1.2 Recording Pressures and Temperatures

Keep a regular daily record of the compressor operating pressure and temperature by noting the indicator readings, together with ambient air temperature, in a record book.

The readings should be taken when conditions are stable and with the compressor running on full load.

1.3 Maintenance Record

Keep a careful record of all servicing, maintenance and repair work carried out on the compressor unit. The record will form a useful reference.

1.4 Electrical Connections

Regularly check for loose connections or frayed wiring. Clean and tighten all connections and repair or replace all frayed or damaged wires and cables before starting up.

Avoid damage to electrical wiring when working on the compressor and ensure no damage will be caused by chafing or contact with hot surfaces.

1.5 Leaks

Inspect for leaks, loose pipe connections and dirt build up prior to carrying out routine maintenance.

Tighten loose connections and repair or replace damaged pipes or hoses immediately.

WARNING: RISK OF HIGH PRESSURE

Do NOT use hands to locate leaks in the system. Always use a piece of paper or card for this purpose.

1.6 Lubricating Oil

It is essential to maintain the correct level of oil and to change the oil completely at the specified intervals. Details are given under 'Maintenance Procedures'.
