[Making Accountability Work](#) Marie-Louise Bemelmans-Videc, Jeremy Lonsdale, Burt Perrin, 2017-12-02 Like honesty and clean water accountability is invariably seen as a good thing Conversely the absence of accountability is associated with most of the greatest abuses in human history Accountability is thus closely linked with the exercise of power and the legitimacy of policies and those pursuing them This book looks at the role of evaluation and of audit as key elements in democratic accountability processes The contributors explore the apparent paradox of there being more accountability related activities today than ever before at the same time as much public debate laments what is seen as a lack of actual accountability Such a situation raises a number of questions Is there a need for different approaches to establishing accountability or can current arrangements be modified to make them more effective Are present practices part of the problem and are they preventing a mature debate about performance improvement taking place How can systems awash with performance information ensure that at least some of it makes sense to a wide range of potential users How is it that greater accountability and transparency can so quickly have become associated with concerns about perverse incentives and be seen by some as a costly burden The volume includes detailed case studies and synthesizes up to date research evidence drawn from very different governmental systems ending with practical advice for those involved in the accountability processes In doing so it attempts to address both conceptual

ambiguities about the notion of accountability and the practical uncertainties over its implications for democratic government This book is aimed at serious people who think about trends in the use of evaluation and audit in seeking to hold governments accountable for their actions and performance

Sustainability and Short-term Policies Stefan Sjöblom, Kjell Andersson, Sarah Skerratt, 2016-04-01 There has been a profound change within the sphere of government and societal regulation in recent years Traditional hierarchical government has been challenged by new governance instruments relying on negotiations instead of command and control Alongside this development there has been a change in the time framing of politics and steering Traditional politics implicitly has been based on stability and permanence while new forms of governance explicitly are based on just in time actions such as projects and issue based

collaborations in networks and programs This book analyses the implications of this shortening of time frames focusing particularly on spatial policy interventions Spatial policies have a special relevance when it comes to governance and new forms of societal steering On the one hand the local geographical level in politics is the principal battleground for the struggle between top down and bottom up approaches and aspirations On the other hand many of the most burning issues of our time require a global strategic approach for example climate change resource depletion population growth are anchored in space and the physical world Whether and how short term spatial approaches can achieve sustainable development outcomes is thus a critical question and forms the focus of this volume The book examines the characteristics of temporary policy measures across a range of rural urban and regional contexts in four continents Europe North America Oceania and Africa The outcomes and effects of these policies and interventions are analysed particularly focusing on the tension between short term interventions and long term effects *Making Coaching Work* David Clutterbuck, David Megginson, 2005

Coaching can work brilliantly It can help you improve your employee retention levels succession planning and organisational creativity In a supportive culture managers coaches and coachees all trust each other and work together Sadly even the best managed coaching programme with the best coaches will fail in the real world where the coaching takes place doesn't match the fine words from HR Spending money on coaching without first ensuring that the groundwork has been done is a fast track to failure Make sure your training and development budget delivers what you need by first creating a culture that supports coaching
