

Releasing residual carbon dioxide from the "SINGLE" pistol Model I with normal locking cap, and introducing a new CO₂ capsule

7

2

The locking cap can be removed only when all the carbon dioxide has been allowed to escape from the pressure chamber. The residual CO₂ can be released by forcing the cocking knobs firmly back towards the locking cap whilst the pistol is NOT cocked. Never use any force when removing the locking cap, and **NEVER** use any tools, e.g., grips, pipe wrench, et altera to un-screw this cap!

When the capsule is empty, un-screw the locking cap. Remove the empty capsule and insert a new one. Replace the locking cap tightly by hand, turning it home to the fullest extent.

Cock the pistol and pull the trigger, but do not load. Repeat this several times until the capsule is open. The pistol is then ready for actual shooting after about 3 such "dry" shots.
