Addiction and Choice Nick Heather, Gabriel Segal, 2017 Views on addiction are often polarised either addiction is a matter of choice or addicts simply can't help themselves But perhaps addiction falls between the two This book contains views from philosophy neuroscience psychiatry psychology and the law exploring this middle ground between free choice and no choice

The Rationalizing Voter Milton Lodge, Charles S. Taber, 2013 Political behavior is the result of innumerable unnoticed forces and conscious deliberation is often a rationalization of automatically triggered feelings and thoughts Citizens are very sensitive to environmental contextual factors such as the title President preceding Obama in a newspaper headline upbeat music or patriotic symbols accompanying a campaign ad or question wording and order in a survey all of which have their greatest influence when citizens are unaware This book develops and tests a dual process theory of political beliefs attitudes and behavior claiming that all thinking feeling reasoning and doing have an automatic component as well as a conscious deliberative component The authors are especially interested in the impact of automatic feelings on political judgments and evaluations This research is based on laboratory experiments which allow the testing of

five basic hypotheses hot cognition automaticity affect transfer affect contagion and motivated reasoning *Evaluating the Brain Disease Model of Addiction* Nick Heather, Matt Field, Antony Moss, Sally Satel, 2022-03-07 This ground breaking book advances the fundamental debate about the nature of addiction As well as presenting the case for seeing addiction as a brain disease it brings together all the most cogent and penetrating critiques of the brain disease model of addiction BDMA and the main grounds for being skeptical of BDMA claims The idea that addiction is a brain disease dominates thinking and practice worldwide However the editors of this book argue that our understanding of addiction is undergoing a revolutionary change from being considered a brain disease to a disorder of voluntary behavior The resolution of this controversy will determine the future of scientific progress in understanding addiction together with necessary advances in treatment prevention and societal responses to addictive disorders This volume brings together the various strands of the contemporary debate about whether or not addiction is best regarded as a brain disease Contributors offer arguments for and against and reasons for uncertainty they also propose novel alternatives to both brain disease and moral models of addiction In addition to reprints of classic articles from the addiction research literature each section contains original chapters written by authorities on their chosen topic The editors have assembled a stellar cast of chapter authors from a wide range of disciplines neuroscience philosophy psychiatry psychology cognitive science sociology and law including some of the most brilliant and influential voices in the field of addiction studies today The result is a landmark volume in the study of addiction which will be essential reading for advanced students and researchers in addiction as well as professionals such as medical practitioners psychiatrists psychologists of all varieties and social workers Addictions Barbara S. McCrady, Elizabeth E. Epstein, 2013-10-03 Addictions A Comprehensive Guidebook Second Edition features a roster of senior scientists covering the latest findings in the study of alcohol and other drug use abuse and dependence A New Approach to Addiction and Choice Reinout W. Wiers, 2024-08-08 This engaging book provides a novel examination of the nature of addiction suggesting that by exploring akrasia the tendency to act against one's better judgement we can better understand our addictive behaviors It offers an alternative to the dominant biomedical model of addiction as a chronic brain disease by looking at the nature of how we make decisions and proposing the idea that biased choice is central to addiction The book looks at both classic substance use disorders and newer addictions to smartphones meat and fossil fuels It discusses current perspectives on free will in philosophy psychology and neuroscience and the questions surrounding free will versus determinism including our ability to steer our behaviors guided by the promise of future outcomes Different perspectives on addiction and choice are presented in an eloquent style and illustrated by personal stories Through a lively discussion of the key scientific and philosophical issues surrounding addiction this book is valuable for students in psychology criminology sociology and social work as well as health care professionals and general readers interested in the nature of our free will Motivation of Health Behavior Paul W. O'Neal, 2007 In psychology motivation refers to the initiation direction intensity and persistence of behaviour Geen 1995

Motivation is a temporal and dynamic state that should not be confused with personality or emotion. Motivation is having the desire and willingness to do something. A motivated person can be reaching for a long term goal such as becoming a professional writer or a more short term goal like learning how to spell a particular word. Personality invariably refers to more or less permanent characteristics of an individual's state of being e.g. shy extrovert conscientious. As opposed to motivation, emotion refers to temporal states that do not immediately link to behaviour e.g. anger grief happiness. This important book is dedicated to motivation of health behaviours.

The Psychology of Prejudice Todd D. Nelson, Michael A. Olson, 2024-01-03. In this book we examine the past and present research and theory on the motivations, the why, the situations and contexts, the when, the individual difference variables and traits, the who, and the affective and cognitive processes, the how, that lead to stereotyping and prejudice. The intent is to provide an in depth and broad ranging analysis of stereotyping and prejudice. The text focuses on understanding the issues, theories and important empirical experiments that bear upon each problem in stereotyping and prejudice and to understand the most up to date research theories and conclusions of the leading researchers in the field. Stereotyping and prejudice are indeed complex in their origin and one of the main goals of this book is to provide a coherent picture of the conditions under which stereotyping and prejudice are more or less likely to occur. Another primary focus is to examine whether and how stereotyping and prejudice can be reduced or eliminated.

Dual-Process Theories of the Social Mind Jeffrey W. Sherman, Bertram Gawronski, Yaacov Trope, 2014-05-09. This volume provides an authoritative synthesis of a dynamic influential area of psychological research. Leading investigators address all aspects of dual process theories: their core assumptions, conceptual foundations and applications to a wide range of social phenomena. In 38 chapters, the volume addresses the pivotal role of automatic and controlled processes in attitudes and evaluation, social perception, thinking and reasoning, self regulation and the interplay of affect, cognition and motivation. Current empirical and methodological developments are described. Critiques of the duality approach are explored and important questions for future research identified.
