Psychiatric Treatment of Victims and Survivors of Sexual Trauma Jamshid A. Marvasti, 2004. Psychological trauma is a multifaceted phenomenon with extensive involvement of biochemical and neurological changes. This book originated on the basis of clinical observations, and the authors believe that trauma is the region in which psych and soma meet each other and integrate, becoming a single entity. In this text, the authors attempt to integrate the psychosocial and bio-neuro-endocrine aspects of human experience, including trauma. Chapter 1 provides a psychobiological perspective of incest and sexual abuse and considers the stages of and reactions to incest that trauma clients have experienced. Chapter 2 focuses on trauma-related syndromes associated with survivors of sexual abuse. Chapter 3 continues the theme of the second chapter, providing further discussion of the link between sexual trauma and somatic sensations of discomfort and pain. Chapter 4 describes the frustration in treating drug/alcohol addicts and the discovery that these individuals have a history of hidden trauma which haunts them and prevents recovery. Chapter 5 explores the victims' response to trauma and examines the nontraditional treatment models for psychological trauma. Chapter 6 presents psychotherapy practices used with incest survivors and details treatment principles and goals and explains new treatment options. Chapter 7 explores the practice of pharmacotherapy in treating trauma-related disorders and focuses on the use of a variety of psychiatric medications for the treatment of PTSD. Chapter 8 presents creative and rehabilitative practices for treating victimized children and adolescents, pointing to the importance of art therapy in the recovery process of traumatized individuals. Chapter 9 provides an overview of play therapy, cognitive-behavioral therapy for sexually abused children and adolescents. Readers will find in this text a diversity of research topics and a variety of clinical observations that are not only useful but timely. Helping Abused and Traumatized Children Eliana Gil, 2011-03-11. Presenting an integrative model for treating traumatized children, this book combines play, art, and other expressive therapies with ideas and strategies drawn from cognitive-behavioral and family therapy. Eliana Gil demonstrates how to tailor treatment to the needs of each child by using both directive and nondirective approaches. Throughout, practical clinical examples illustrate ways to target trauma-related symptomatology while also helping children process painful feelings and memories that are difficult to verbalize. The book concludes with four in-depth cases that bring to life the unique situation of each child and family, the decision-making process of the therapist, and the applications of developmentally informed, creative, and flexible interventions. **Touch in Child Counseling and Play**
