competence observe and distinguish east and west differences with multi dimensional perspective transcend cultural barriers and learn to use translation skills Studies on the Teaching of Translation is another interesting topic that has attracted enormous attention such as Business Translation Teaching from the Perspective of Metaphors by Dandan Li which explores application of conceptual metaphor theory in the translation process of business lexicons business discourse and business English culture so as to provide a new perspective in business English pedagogy Another study entitled Cognitive Studies in Translation by Xin Huang analyzes the cognitive studies of translation interpreting processes over the past three decades with focus on the issues examined the findings reached as well as the recent development She explains that cognitive studies of translation process examine the translation competence on line translation behaviors such as how the eye gazes and how the words are typed and the brain activities when doing translation Special interests are paid to the working memory problem solving the executive function and some linguistic relative factors such as text difficulty Over the past thirty years the interest in the field has been gaining considerable momentum and increasing issues have been involved Finally she concludes that with the advancement of technologies and interdisciplinary approaches the black box the previously unforeseeable cognitive activities of how human process translation can be unfolded Considering the importance of integrating theory with practice the proceedings are therefore compiled in such a way as to be balanced and inclusive in the hope of summarizing current accomplishments as well as providing certain insights for teaching and further research in the field of translation and interpretation studies *Technical Report* ,1979
