PC Graphics & Video, 1997 *Creating Experimental Documentary Films* Pablo Frasconi, 2025-06-30 This book explores the continued development and practice of experimental documentary film making with evolving trends in still photography visual arts journalism installation art docudrama interactive media music poetry and creative nonfiction Through examples observations analyses and exercises readers will gain an understanding of the traditional principles of documentary and simultaneously challenge those conventions While exploring the responsibilities of a documentary director to be fair and objective the book weaves through arguments around truth and propaganda and offers practical lessons about how to create hybrid forms of documentary films Written by a documentary filmmaker with decades of experience the text provides a comprehensive overview of how documentary narratives are written and created in the research pre production production and post production phases New inclusive audiences and methods of distribution interactivity and immersion are also introduced as part of the changing landscape of the documentary genre This book is designed for students who are approaching documentary for the first time as well as documentary filmmakers who are searching for new approaches new subject matter and languages of cinematic expression

Surviving the Wild Wild Web Marton Gergely, Ian Grey, Heba Saleous, 2024-12-26 The information security arena is often vague and confusing for internet users both young and old New traps are being devised daily and falling into them can take legal ethical financial physical and mental tolls on individuals With increasing cases of fake news identity theft piracy spying and scams surfacing this book explains the risks of the internet and how they can be mitigated from a personal and professional perspective *Surviving the Wild Wild Web A User's Playbook to Navigating the Internet's Trickiest Terrains* is a readable guide addressing the malicious behaviors within internet cultures Written in simple and jargon free language the book describes ten pillars of information security risks faced by all internet users Each pillar will be detailed as a story starting with the roots of the problem and branching out into tangential related issues and topics Each chapter ends by detailing ways a user can avoid falling victim to cyber threats It uses a combination of news articles topical current events and previously published academic research to underpin the ideas and navigates how users interact with the World Wide Web The book aims to create a generation of internet literate readers who can spot the pitfalls of the internet in their personal and professional lives to surf the web safely This guide will appeal to any individual interested in internet safety with a potential readership extending to students and professionals in the fields of computer science information systems cybersecurity business management human resources psychology medicine education law and policy

Surveillance Education Nolan Higdon, Allison Butler, 2024-08-02 *Surveillance Education* explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational

process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education **PC World** ,2004 **Popular Science** ,2004-12 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better

Nintendo Power ,2009 **ID** ,2000 **Microtimes** ,1989 **Men's Health** ,2008-01 Men s Health magazine contains daily tips and articles on fitness nutrition relationships sex career and lifestyle **1394 Newsletter** ,
