Leverage Your Security Expertise in IBM System z™ Mainframe Environments For over 40 years the IBM mainframe has been the backbone of the world's largest enterprises. If you're coming to the IBM System z mainframe platform from UNIX, Linux, or Windows, you need practical guidance on leveraging its unique security capabilities. Now IBM experts have written the first authoritative book on mainframe security specifically designed to build on your experience in other environments. Even if you've never logged onto a mainframe before, this book will teach you how to run today's z/OS operating system, command line and ISPF toolset, and use them to efficiently perform every significant security administration task. Don't have a mainframe available for practice? The book contains step-by-step videos walking you through dozens of key techniques. Simply log in and register your book at www.ibmpressbooks.com to register to gain access to these videos. The authors illuminate the mainframe's security model and call special attention to z/OS security techniques that differ from UNIX, Linux, and Windows. They thoroughly introduce IBM's powerful Resource Access Control Facility (RACF) security subsystem and demonstrate how mainframe security integrates into your enterprise-wide IT security infrastructure. If you're an experienced system administrator or security professional, there's no faster way to extend your expertise into big iron environments. Coverage includes: Mainframe basics, logging on, allocating and editing data sets, running JCL jobs using UNIX System Services, and accessing documentation. Creating, modifying, and deleting users and groups. Protecting data sets, UNIX file system files, databases, transactions, and other resources. Manipulating profiles and managing permissions. Configuring the mainframe to log security events, filter them appropriately, and create usable reports. Using auditing tools to capture static configuration data and dynamic events, identify weaknesses, and remedy them. Creating limited authority administrators: how, when, and why.

Mastering XPages Martin Donnelly, Mark Wallace, Tony McGuckin, 2011

The first complete practical guide to XPages development, direct from members of the XPages development team at IBM Lotus. Martin Donnelly, Mark Wallace, and Tony McGuckin have written the definitive programmer's guide to utilizing this breakthrough technology. Packed with tips, tricks, and best practices from IBM's own XPages developers, Mastering XPages brings together all the information developers need to become experts, whether you're experienced with Notes Domino development or not. The authors start from the very beginning, helping developers steadily build your expertise through practical code examples and clear, complete explanations. Readers will work through scores of real-world XPages examples, learning cutting-edge XPages and XSP language skills and gaining deep insight into the entire development process.

Drawing on their own experience working directly with XPages users and customers the authors illuminate both the technology and how it can be applied to solving real business problems Martin Donnelly previously led a software startup that developed and distributed small business accounting software Donnelly holds a Commerce degree from University College Cork and an M S in Computer Science from Boston University Mark Wallace has worked at IBM for 15 years on many projects as a technical architect and application developer Tony McGuckin participates in the Lotus OneUI Web Application and iWidget Adoption Workgroup He holds a bachelor s degree in Software Engineering from the University of Ulster
